Foreword ... 4

Introduction ... 6

1 Scope ... 7

2 Normative references ... 7

3 Terms and definitions ... 7

4 Principle ... 8

5 Interferences ... 8

6 Designation ... 8

7 Reagents ... 9

8 Apparatus ... 9

9 Procedure ... 10
9.1 General ... 10
9.2 Sample pretreatment ... 10
9.3 Filtration ... 10
9.4 Extraction ... 11
9.5 Clarification of extracts ... 12
9.5.1 General ... 12
9.5.2 Clarification by filtration ... 12
9.5.3 Clarification by centrifugation ... 12
9.6 Photometry ... 12

10 Calculation ... 13

11 Validity criteria ... 13

12 Quality assurance ... 13
12.1 Blank values ... 13
12.2 Multiple determinations ... 13
12.3 Examination of the absorption spectrum ... 13
12.4 Determining the limit of quantification ... 14

13 Expression of results ... 14

14 Test report ... 14

15 Performance data ... 14

Annex A (informative) **Derivation of the calculation equation for chlorophyll-a, equations for estimating the phaeopigment concentration and the uncorrected chlorophyll-a** ... 15

Annex B (informative) **Absorption spectrum** ... 17

Annex C (informative) **Example for determining the limit of quantification** ... 23

Annex D (informative) **Example for calculation of chlorophyll-a and phaeopigment concentrations** ... 26

Annex E (informative) **Performance data** ... 27

Bibliography ... 30

Figures

Figure B.1 — Example of the decomposition of the spectrum of the non-acidified sample (A_v) taking into account the spectrum after acidification (A_n). Using Equation (B.5) the presumed spectrum for chlorophyll-a can be obtained (A_c) 18

Figure B.2 — Example for the comparison of a spectrum for chlorophyll-a (A_c) determined according to this standard with the reference spectrum according to Mölleken normalized to the maximum of A_c ([5] and Table B.1) 19

Figure B.3 — Example of the comparison of a spectrum for phaeopigment (A_n) determined according to this standard with the reference spectrum standardized to the maximum of A_n according to Mölleken ([5] and Table B.1) 20

Figure C.1 — Illustration of the limit of quantification 25

Tables

Table B.1 — Reference spectra of chlorophyll-a and phaeopigment (according to Mölleken [5]), normalized to a maximum absorption of 1,0 21

Table C.1 — Measured values of an exemplary determination of the limit of quantification 23

Table C.2 — Φ-values according to DIN 32645 for $n = 10$ 24

Table C.3 — Quantification limits (in µg/l) for chlorophyll-a with varied parameters k and α (based on the example in Table C.1) 24

Table E.1 — Performance data for chlorophyll-a according to DIN ISO 5725-2 [6] 28

Table E.2 — Performance data for phaeopigment according to DIN ISO 5725-2 [6] 28

Table E.3 — Performance data for uncorrected chlorophyll-a according to DIN ISO 5725-2 [6] 29
