ISO 24536:2019-10 (E)

Service activities relating to drinking water supply, wastewater and stormwater systems - Stormwater management - Guidelines for stormwater management in urban areas

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative reference 1

3 Termsanddefinitions 1

4 General overview 1
4.1 Principles 1
4.2 Basic concepts 2
4.3 Stormwater management process 3

5 Objectives 4

6 Functional requirements 8
6.1 General 8
6.2 Protection from surface water flooding 9
6.3 Protection from sewer flooding 9
6.4 Protection of surface receiving water bodies 10
6.5 Protection of groundwater 10
6.6 Maintainability 10
6.7 Integrity of structures 10
6.8 Sustainable use of products and materials 10
6.9 Sustainable use of energy 10
6.10 Protection of adjacent structures and utility services 10
6.11 Maintaining the flow 10
6.12 Watertightness 10
6.13 Prevention of odours and emission of toxic, explosive and corrosive gases 10
6.14 Prevention of noise and vibration 11
6.15 Input quality 11
6.16 Protection of downstream drainage systems 11
6.17 Protection from natural disaster events 11
6.18 Health and safety 11
6.18.1 General 11
6.18.2 Public health and safety 11
6.18.3 Occupational health and safety 11

7 Performance requirements 12
7.1 General 12
7.2 Examples of performance requirements 12
7.2.1 Protection of receiving water bodies 12
7.2.2 Protection from flooding 14
7.2.3 Structural integrity and design working life 15

8 Design criteria 15
8.1 Introduction 15

8.2 Hydraulic design criteria 16
8.2.1 Introduction 16
8.2.2 Full pipe design rainfall criteria 16
8.2.3 Flooding design criteria 17
8.2.4 Effect on downstream water bodies 18
8.3 Environmental design criteria 19
8.4 Structural design criteria 20
8.5 Operation and maintenance (O&M) design criteria 20
8.6 Amenity and biodiversity design criteria 20
8.6.1 Amenity design criteria 20
8.6.2 Biodiversity design criteria 20

9 Investigation 21

9.1 Introduction 21
9.2 Purpose of investigation 21
9.3 Review of performance information 22
9.4 Determine the scope of investigation 23
9.5 Review existing information 23
9.6 Inventory update 24
9.7 Hydraulic investigation 25
9.8 Hydrology 25
9.8.1 Selection of the design rainfall 25
9.8.2 Flood occurrence probability 27
9.8.3 Water quantity 27
9.8.4 Water quality 27
9.9 Environmental investigation 28
9.10 Structural investigation 28
9.11 Operational investigation 29
9.12 Existing facilities 29
9.13 Social consequences 29

10 Assessment 29
10.1 Introduction 29
10.2 Assessment of the hydraulic performance 30
10.3 Assessment of environmental impact 30
10.4 Assessment of structural condition 31
10.5 Assessment of operational performance 31
10.6 Assessment of social and economic benefits and public satisfaction 31
10.7 Comparison with performance requirements 31
10.8 Identification of unacceptable impacts 31
10.9 Identification of causes of performance deficiencies 31
10.10 Setting goals 31
10.11 Prioritization of measures 31

11 Planning 32
11.1 Planning principles 32
11.2 Basic planning concepts 32
11.3 System components 33
11.3.1 Overview 33
11.3.2 Components for quantity control 33
11.3.3 Components for quality control 34
11.4 Asset-related solutions 35
11.4.1 General 35
11.4.2 Stormwater network 36
11.4.3 Sustainable drainage systems 36
11.4.4 Utilization of existing components 37
11.4.5 Asset-related solutions through collaboration with other projects 38
11.5 Non-asset-related solutions 40
11.5.1 General 40
11.5.2 Demand control 40
11.5.3 Flood resilience approaches 41

11.5.4 Disaster preparedness and response 41
11.5.5 Emergency response and recovery 43
11.5.6 Utilization of information and communication technology (ICT) 44
11.5.7 Insurance 44
11.6 Management aspects of planning 45
11.7 Phased implementation plan 45

12 System performance evaluation 46
12.1 General 46
12.2 Cost-benefit analysis 46
12.3 Evaluation of system performance 46
12.4 Monitoring of system performance 47
12.5 Retrospective evaluation 47

Annex A (informative) The concept of the largest recorded rainfalls 48

Annex B (informative)Cost-benefitanalysis:exampleofcalculationmethodologies 50
