ISO 10802:2020 (E)

Ductile iron pipelines — Hydrostatic testing after installation

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and Definitions

4 Safety

5 Preparation of the test sections

- 5.1 General conditions
- 5.2 Pressure pipelines
- 5.2.1 General
- 5.2.2 Anchoring and closures
- 5.2.3 Partial backfilling before testing
- 5.2.4 Filling with water and air venting
- 5.3 Non-pressure pipelines

6 Pressure testing procedure

- 6.1 General
- 6.2 Preliminary operations for pressure pipelines
- 6.3 Preliminary test for pressure pipelines
- 6.4 Main pressure test
- 6.4.1 General
- 6.4.2 Water loss test
- 6.4.2.1 General
- 6.4.2.2 Water loss test — Falling pressure (WLFP)
- 6.4.2.3 Water loss test — Constant pressure (WLCP)
- 6.4.3 Pressure drop test — Direct reading (PDDR)
- 6.5 Determination of acceptance
- 6.6 Testing of the complete pipeline
- 6.7 Non-pressure pipelines

7 Acceptance criteria

- 7.1 Pressure pipelines
- 7.1.1 Water loss test — Falling pressure and water loss test — Constant pressure
- 7.1.2 Pressure drop test — Direct reading
- 7.2 Non-pressure pipelines

Annex A (informative) Test methods description and comparison

Annex B (informative) Example of hydrostatic testing report

Annex C (informative) Pressure pairing of component pressures and pipeline pressures
