Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Principle 1

4 Test environment 1

5 Reagents and materials 2

6 Apparatus 3

7 Treatment and preparation of samples 3
7.1 Special precautions for sampling and transportation of water or effluent samples 3
7.2 Preparation of solutions of substances to be tested 3

8 Procedure 4
8.1 Controls 4
8.2 Selection of exposure concentrations 4
8.3 Renewal of exposure solutions 5
8.4 Introduction of animals into the test system 5
8.5 Feeding of organisms 5
8.6 Observations and measurements 5
8.7 Validity of the test 6

9 Data analysis and expression of results 6

10 Test report 7

Annex A (informative) OECD M4 and M7 media -- Preparation and acclimation of Elendt M4 and M7 media 9

Annex B (informative) ASTM reconstituted hard fresh water 12

Annex C (informative) Data collection sheet 13

Annex D (informative) Calculation of time-weighted mean concentration 15
