# DIN EN 476:2022-09 (E)

## General requirements for components used in drains and sewers

## Contents

Page

European foreword ..... 4

1 Scope ..... 5

2 Normative references ..... 6

3 Terms and definitions ..... 6

4 Symbols and abbreviations ..... 12

5 Dimensional requirements ..... 13
5.1 General ..... 13
5.2 Dimensions of pipes and fittings ..... 13
5.2.1 Nominal sizes ..... 13
5.2.2 Internal diameters and tolerances ..... 13
5.2.3 Geometrical characteristics of pipes ..... 13
5.2.4 Geometrical characteristics of fittings ..... 14
5.3 Dimensions of manholes and inspection chambers ..... 15
5.3.1 Manholes ..... 15
5.3.2 Inspection chambers ..... 16
5.3.3 Geometrical characteristics of manholes and inspection chambers ..... 16
5.4 Covers and frames ..... 16
5.5 Connection to the piping system and components ..... 17

6 Performance requirements ..... 17
6.1 General ..... 17
6.2 Mechanical requirements of pipes and fittings ..... 17
6.3 Mechanical requirements of shafts of manholes and inspection chambers ..... 18
6.3.1 General ..... 18
6.3.2 Circular sections ..... 18
6.3.3 Other shapes ..... 18
6.3.4 Tapers/cones, reducing and cover slabs ..... 19
6.4 Tightness ..... 19
6.4.1 Test pressure ..... 19
6.4.2 Sealings for joints ..... 20
6.4.3 Joint deflection ..... 21
6.4.4 Joint shear load ..... 21
6.4.5 Restrained joints ..... 22
6.5 Continuity of invert ..... 22
6.6 Temperature resistance ..... 22
6.7 Dimensional stability ..... 22
6.8 Smoothness of bore ..... 23
6.9 Appearance ..... 23
6.10 Chemical and corrosion resistance ..... 23
6.11 Abrasion resistance ..... 23
6.12 Coatings and linings ..... 23
6.13 Durability ..... 23
6.14 Resistance against cleaning operations ..... 23
6.15 Handling ..... 23
6.16 Reaction to fire ..... 23

7 Test methods ..... 23

7.1 Measurement of dimensions ..... 23
7.1.1 Internal diameter ..... 23
7.1.2 External diameter ..... 24
7.1.3 Spigots and sockets ..... 24
7.1.4 Wall thickness of pipes ..... 24
7.1.5 Deviation from straightness of pipes ..... 24
7.1.6 Deviation from squareness of the ends of the pipes ..... 24
7.2 Load bearing capacity tests ..... 24
7.2.1 Load bearing capacity tests for pipes ..... 24
7.2.2 Load bearing capacity tests for sections of manholes and shafts ..... 25
7.3 Longitudinal bending moment resistance test for pipes ..... 25
7.4 Tightness tests ..... 26
7.4.1 Tightness test of pipes, fittings, manholes and inspection chambers ..... 26
7.4.2 Tightness test of joints ..... 27
7.4.3 Test methods for drains and sewers components ..... 28

8 Marking, labelling and packaging ..... 28

Annex A (informative) Preferred nominal sizes ..... 29

Bibliography ..... 30
