ISO 21052:2021-11 (E)

Restrained joint systems for ductile iron pipelines - Calculation rules for lengths to be restrained

Contents

Page

Foreword ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and symbols **1**
3.1 Terms and definitions 1
3.2 Symbols 3

4 Thrust restraint principles, calculation rules and general specification **4**
4.1 Thrust forces 4
4.2 Calculation rules and general specification 4
4.3 Standard jointing systems offer no longitudinal restraint 5
4.4 Restrained joint systems 5
4.5 Length to be restrained 5
4.6 Restrained design method 5
4.7 Gravity thrust blocks 6

5 Thrust force **6**
5.1 Internal hydrostatic pressure in straight pipes 6
5.2 Internal hydrostatic pressure in bends 6
5.3 Internal hydrostatic pressure in other configurations 7

6 Restrained joints **8**
6.1 Principle 8
6.2 Conservative design 8
6.3 Required prevailing site conditions 8

7 Unit frictional force, F_s **8**
7.1 Static frictional force 8
7.2 Values of soil cohesion 9

8 Polyethylene encasement and PU coating and other extruded organic coatings **10**

9 Unit bearing resistances, R_s **10**
9.1 Lateral resistance, passive soil pressure 10
9.2 Design value of passive soil pressure 10
9.3 Empirical values of passive soil pressure 11

10 Application to common situations **14**
10.1 Horizontal bends 14
10.2 Vertical down bends 15
10.3 Vertical up bends 15
10.4 Tees 16
10.5 Reducers 17
10.6 Dead ends 17
10.7 Encroaching restrained lengths 17
10.8 Equal angle vertical offset (θ) 18
10.9 Combined horizontal equal angle bends (θ) 19
10.10 Combined horizontal unequal angle bends 20
10.11 Combined vertical equal angle offsets (θ) 21
10.11.1 Pipeline under obstruction 21
10.11.2 Pipeline over obstruction 22

11 Restrained lengths **22**

12 Installation and laying instruction **22**
12.1 Select backfill considerations 22
12.1.1 Backfill material versus native soil support characteristics 22
12.1.2 Swamps or marshes 22
12.2 Combining thrust blocks/anchor blocks and restrained joints 22
12.3 Pipe in a casing 23
12.3.1 Restrained lengths inside casing 23
12.3.2 Balancing the thrust force with restraining lengths outside the casing 23
12.4 Future excavations 23
Annex A (informative) **Dimensions and unit weights of pipes filled with water for preferred class** **24**
Annex B (informative) **Soil classification chart** **25**
Bibliography **26**
