## Rainwater harvesting systems - Part 100: Regulations in connection with DIN EN 16941-1

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
<b>1</b> Scope .....		7
<b>2</b> Normative references .....		7
<b>3</b> Terms and definitions.....		9
<b>4</b> Planning principles for installation design.....		10
4.1 Consumption values .....		10
4.2 Infiltration .....		11
<b>5</b> Cleaning mechanisms .....		11
<b>6</b> Filters .....		12
6.1 Requirements .....		12
6.1.1 General .....		12
6.1.2 Materials .....		12
6.1.3 Filter types.....		13
6.1.4 Hydraulic requirements.....		15
6.1.5 Filter separation efficiency .....		16
6.1.6 Leaktightness .....		16
6.1.7 Stability.....		16
6.2 Testing .....		16
6.2.1 General .....		16
6.2.2 Materials, dimensions, filter elements and filter inserts .....		17
6.2.3 Design and installation location.....		17
6.2.4 Checking compliance with hydraulic requirements .....		17
6.2.5 Test of the filter separation efficiency.....		21
6.3 Marking .....		24
6.4 Installation, operation and maintenance of filters.....		24
<b>7</b> Rainwater storage tanks.....		25
7.1 Dimensions and tolerances.....		25
7.1.1 Tanks.....		25
7.1.2 Inspection openings .....		25
7.1.3 Manholes and access openings .....		26
7.1.4 Storage tank characteristics .....		27
7.1.5 Built-in components.....		28
7.1.6 Tank connections .....		28
7.2 Installation and assembly.....		28
7.2.1 Access openings and manholes.....		28
7.2.2 Manhole covers .....		28
7.2.3 Watertightness.....		29
7.2.4 Stability.....		29
7.2.5 Design.....		32
7.2.6 Protection against backwater .....		32
7.3 Testing .....		33
7.3.1 Dimensions.....		33
7.3.2 Watertightness.....		34
7.3.3 Stability.....		34

<b>8</b>	<b>Rainwater system controls</b> .....	<b>35</b>
<b>8.1</b>	<b>Construction principles</b> .....	<b>35</b>
<b>8.1.1</b>	<b>General requirements</b> .....	<b>35</b>
<b>8.1.2</b>	<b>Electrical protection class</b> .....	<b>35</b>
<b>8.1.3</b>	<b>Operating condition limits</b> .....	<b>35</b>
<b>8.2</b>	<b>Minimum requirements for rainwater system controls</b> .....	<b>35</b>
<b>8.3</b>	<b>Noise level</b> .....	<b>36</b>
<b>8.4</b>	<b>Testing</b> .....	<b>36</b>
<b>8.4.1</b>	<b>General</b> .....	<b>36</b>
<b>8.4.2</b>	<b>Electrical safety</b> .....	<b>37</b>
<b>8.4.3</b>	<b>Leakage rate of the backflow preventer of the backflow protection</b> .....	<b>37</b>
<b>8.4.4</b>	<b>Simplified method of measuring the noise level</b> .....	<b>37</b>
<b>9</b>	<b>Identification plate</b> .....	<b>39</b>
<b>Annex A</b>	<b>(informative) Example of a calculation form for determining rainwater yield, operating demand and usable capacity of rainwater storage tanks</b> .....	<b>40</b>
<b>Annex B</b>	<b>(informative) Examples of determining the separation efficiency of a filter</b> .....	<b>41</b>
<b>B.1</b>	<b>General</b> .....	<b>41</b>
<b>B.2</b>	<b>Example of determining the separation efficiency of type A filters</b> .....	<b>41</b>
<b>B.3</b>	<b>Example of determining the separation efficiency of type B filters</b> .....	<b>42</b>
<b>B.4</b>	<b>Examples of determining the separation efficiency of type C filters</b> .....	<b>43</b>
<b>B.5</b>	<b>Extreme examples</b> .....	<b>44</b>
<b>Annex C</b>	<b>(informative) Example of a test report for filters</b> .....	<b>46</b>
<b>Annex D</b>	<b>(informative) Examples of common system types in Germany and their integration into building services engineering</b> .....	<b>48</b>
<b>Bibliography</b>	.....	<b>51</b>

## Figures

<b>Figure 1</b>	<b>— Principle of type A filters, schematic</b> .....	<b>14</b>
<b>Figure 2</b>	<b>— Principle of type B filters, schematic</b> .....	<b>15</b>
<b>Figure 3</b>	<b>— Principle of type C filters, schematic</b> .....	<b>15</b>
<b>Figure 4</b>	<b>— Test assembly</b> .....	<b>18</b>
<b>Figure 5</b>	<b>— Tank dimensions</b> .....	<b>25</b>
<b>Figure 6</b>	<b>— Manhole — inspection chamber combination</b> .....	<b>26</b>
<b>Figure 7</b>	<b>— Example of an inspection chamber with manhole height <math>\leq 450</math> mm</b> .....	<b>27</b>
<b>Figure 8</b>	<b>— Example of an inspection chamber with manhole height <math>&gt; 450</math> mm</b> .....	<b>27</b>
<b>Figure 9</b>	<b>— Rainwater storage tank with double anti-flooding device and connection to combined sewage system</b> .....	<b>33</b>
<b>Figure 10</b>	<b>— Test set-up for measuring the sound pressure level</b> .....	<b>38</b>
<b>Figure B.1</b>	<b>— Test arrangement for determining the separation efficiency of type A filters</b> .....	<b>41</b>
<b>Figure B.2</b>	<b>— Test arrangement for determining the separation efficiency of type B filters</b> .....	<b>42</b>
<b>Figure B.3</b>	<b>— Test arrangement for determining the separation efficiency of type C filters</b> .....	<b>43</b>
<b>Figure C.1</b>	<b>— Representation of hydraulic efficiency</b> .....	<b>47</b>
<b>Figure D.1</b>	<b>— Rainwater harvesting system with buried tank and infiltration system</b> .....	<b>48</b>

Figure D.2 — Rainwater harvesting system with tank in basement .....	49
Figure D.3 — Rainwater harvesting system with buried tank and hybrid tank, e.g. for trade and industry .....	50

## Tables

Table 1 — Determining the annual non-potable water demand.....	11
Table 2 — Filter types .....	13
Table 3 — Test times for volume flows.....	20
Table 4 — Test substance per 1 000 litre test medium .....	22
Table 5 — Silica sand additive.....	22
Table 6 — Tolerances .....	25
Table 7 — Action classes for underground rainwater storage tanks under traffic areas (characteristic sizes) .....	31
Table 8 — Methods of testing water tightness .....	34
Table 9 — Minimum requirements for rainwater system controls.....	36
Table 10 — Maximum permissible leakage rate of the backflow preventer of the backflow protection.....	37
