

# ISO 24416:2022-07 (E)

## Water reuse in urban areas - Guidelines for water reuse safety evaluation - Stability evaluation of reclaimed water

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	2
5	Water quality stability .....	3
5.1	General .....	3
5.2	Evaluation principles of water quality stability .....	6
6	Evaluation system of water quality stability .....	7
7	Evaluation parameters of water quality stability .....	8
7.1	General .....	8
7.2	Single parameters .....	8
7.3	Composite parameters .....	11
7.3.1	General .....	11
7.3.2	Langelier saturation index (LSI) .....	12
7.3.3	Ryznar stability index (RSI) .....	12
7.3.4	Calcium carbonate precipitation potential (CCPP) .....	13
7.3.5	Aggressive index (AI) .....	13
7.3.6	Larson corrosion index (LR) .....	13
7.3.7	Riddick corrosion index (RI) .....	14
7.4	Selection principles of evaluation parameters .....	15
7.5	Case study of evaluation parameters selection .....	16
8	Evaluation parameters of water quality stability for pipeline networks .....	17
9	Evaluation parameters of water quality stability for equipment .....	17
Annex A (informative)	Information on corrosion types .....	19
Annex B (informative)	Chemical stability guidelines for water quality in urban water supply systems of some countries .....	20
Annex C (informative)	Guidelines for water conditioning of boiler water in Japan .....	21
Annex D (informative)	Reuse of urban recycling water -- Water quality standard for industrial use in China .....	22
Annex E (informative)	Water quality parameter limits of reclaimed water depending on specific use .....	24
Annex F (informative)	Modification methods based on the original AOC method .....	25
Annex G (informative)	Biological stability guideline values for AOC .....	26

<b>Annex H (informative) Comparison of measurement methods for evaluation parameters of biological stability .....</b>	<b>27</b>
<b>Annex I (informative) Chemical stability evaluation conclusions for different composite parameters .....</b>	<b>28</b>
<b>Annex J (informative) Guideline values of reclaimed water used intoiletflushing .....</b>	<b>29</b>
<b>Annex K (informative) Guideline values of reclaimed water used for recreational purposes .....</b>	<b>30</b>
<b>Bibliography .....</b>	<b>31</b>
