ISO 13528:2022-08 (E)

Statistical methods for use in proficiency testing by interlaboratory comparison

Co	Contents				
For	eword		v		
0					
	Intr	oduction	vi		
1	Scop	e	1		
2	Nori	native references	1		
3		ns and definitions			
4	Cone	General principles			
	4.1	General requirements for statistical methods	4		
	4.2	Basic model	5		
	4.3	General approaches for the evaluation of performance			
5	Guid	elines for the statistical design of proficiency testing schemes	6		
	5.1	Introduction to the statistical design of proficiency testing schemes	6		
	5.2	Basis of a statistical design			
	5.3	Considerations for the statistical distribution of results			
	5.4 5.5	Guidelines for choosing the reporting format			
	5.5	5.5.1 General requirements for reporting format			
		5.5.2 Reporting of replicate measurements	9		
		5.5.3 Reporting of 'less than' or 'greater than' a limit (censored data)	9		
		5.5.4 Number of significant digits	9		
6	Guid	elines for the initial review of proficiency testing items and results	10		
	6.1	Homogeneity and stability of proficiency test items	10		
	6.2	Considerations for different measurement methods			
	6.3	Blunder removalVisual review of data			
	6.4 6.5	Robust statistical methods			
	6.6	Outlier techniques for individual results			
7	Dete	rmination of the assigned value and its standard uncertainty			
•	7.1	Choice of method of determining the assigned value	14		
	7.2	Determining the uncertainty of the assigned value	14		
	7.3	Formulation			
	7.4	Certified reference material			
	7.5	Results from one laboratory			
	7.6 7.7	Consensus value from expert laboratories			
	7.8	Comparison of the assigned value with an independent reference value			
8		rmination of criteria for evaluation of performance			
0	8.1	Approaches for determining evaluation criteria			
	8.2	By perception of experts			
	8.3	By experience from previous rounds of a proficiency testing scheme			
	8.4	By use of a general model	21		
	8.5	Using the repeatability and reproducibility standard deviations from a previous	00		
	0.6	collaborative study of precision of a measurement method			
	8.6 8.7	From data obtained in the same round of a proficiency testing scheme			
9		ulation of performance statistics			
9	9.1	General considerations for determining performance			
	9.2	Limiting the uncertainty of the assigned value			
	9.3	Estimates of deviation (measurement error)	25		
	9.4	z scores			
	9.5	z' scores	27		

	9.6	Zeta scores (ζ)	28		
	9.7	$E_{\rm n}$ scores			
	9.8	Evaluation of participant uncertainties in testing			
	9.9	Combined performance scores	31		
10	Graphical methods for describing performance scores				
	10.1	Application of graphical methods	32		
	10.2	Histograms of results or performance scores			
	10.3	Kernel density plots	33		
	10.4	Bar-plots of standardized performance scores	34		
	10.5	Youden plot	34		
	10.6	Plots of repeatability standard deviations			
	10.7	Split samples	36		
	10.8	Graphical methods for combining performance scores over several rounds of a			
		proficiency testing scheme	37		
11	Design and analysis of qualitative proficiency testing schemes (including nominal				
		rdinal properties)	38		
	11.1	Types of qualitative data	38		
	11.2	Statistical design	38		
	11.3	Assigned values for qualitative proficiency testing schemes	39		
	11.4	Performance evaluation and scoring for qualitative proficiency testing schemes	40		
Ann	ex A (no	rmative) Symbols	42		
Ann	ex B (inf	Formative) Homogeneity and stability of proficiency test items	44		
Ann	ex C (inf	ormative) Robust analysis	52		
Ann	Annex D (informative) Additional guidance on statistical procedures
