DIN EN 17176-2:2022-12 (E)

Plastics piping systems for water supply and for buried and above ground drainage, sewerage and irrigation under pressure - Oriented unplasticized poly(vinyl chloride) (PVC-O) - Part 2: Pipes (includes Amendment A1:2022)

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Symbols 8

5 Material 8
5.1 General 8
5.2 Density 8
5.3 MRS class 8
5.4 Orientation factor 9

6 General characteristics 9
6.1 Appearance 9
6.2 Colour 9
6.3 Opacity 9
6.4 Classification of pipes 9
6.4.1 Classification 9
6.4.2 Calculation of wall thickness 10

7 Geometrical characteristics 10
7.1 Measurement of dimensions 10
7.2 Length of pipes 10
7.3 Nominal outside diameters and wall thicknesses 11
7.4 Pipes with integral sockets with elastomeric sealing ring type 13
7.5 Pipe ends with integral sockets with solvent cement joints 14
7.6 Plain ends 14

8 Selection of pipes 14
8.1 Selection of nominal pressure and pipe series S for water up to and including 25 °C 14
8.2 Determination of the allowable operating pressure for water up to 45 °C 14

9 Mechanical characteristics 15
9.1 Resistance to hydrostatic pressure 15
9.1.1 General 15
9.1.2 Pipes 17
9.1.3 Pipes with integral sockets 17
9.2 Impact strength 17
9.3 Ring stiffness 18

10 Physical characteristics 18

11 Sealing rings 19

12 Adhesives 19

13 Marking 20
13.1 General 20
13.2 Minimum required marking 20
13.3 Additional marking 20

Annex A (normative) Establishment of the pipe material classification 21

A.1 General 21
A.2 Determination of PVC-O pipe material classification 21
A.2.1 Procedure 21
A.2.2 Classified feedstock material 22
A.2.3 Not classified feedstock material 22

Annex B (normative) Minimum depth of engagement of sockets 23

B.1 General 23
B.2 Calculation of depth of engagement 23

Annex C (normative) Temperature derating factor 26

Annex D (informative) Calculation of negative pressure capability of pipes 27

D.1 Negative pressure capability of pipes 27

Annex E (normative) Determination of axial and circumferential orientation factor 28

E.1 Principle 28
E.2 Method 28
E.3 Test parameters 28
E.4 Test procedure 28
E.5 Test report 29
