DIN EN 16479:2025-09 (E)

Water quality - Performance requirements and conformity test procedures for water monitoring equipment - Automatic sampling devices (samplers) for water and waste water

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 General requirements for samplers 10

5 Performance requirements 13
5.1 Sample volume 13
5.2 Sampling principles 13
5.3 Sample line velocity 13
5.4 Power supply 13
5.5 Sample integrity 13
5.6 Sample timing error 14
5.7 Effect of ambient air temperature 14
5.7.1 Samplers not incorporating sample temperature control 14
5.7.2 Samplers incorporating sample temperature control 14

6 Conformity testing 15
6.1 General requirements 15
6.2 Test conditions 15
6.3 Verification by inspection 16
6.4 Performance tests 16
6.4.1 Collected sample volume 16
6.4.2 Testing of sampling principles 17
6.4.3 Sample line velocity 19
6.4.4 Power supply test 19
6.4.5 Sample integrity 20
6.4.6 Sampler timing error 21
6.4.7 Ambient air temperature effects 21

Annex A (normative) Evaluation of conformity test data 24

A.1 Test 6.4.1.1 C.T.C.V. Time proportional sampling principle 24
A.1.1 Example calculation of sample volume bias and repeatability 24
A.2 Test 6.4.1.2 C.T.V.V. Flow proportional sampling principle 25
A.2.1 Calculation of set sample volume 25
A.2.2 Assessment of conformity 25
A.3 Test 6.4.2 Testing of sampling principles 25
A.3.1 Data reporting 25
A.3.2 Assessment of conformity 25
A.4 Test 6.4.3 Sample line velocity 25
A.4.1 Data reporting 25
A.4.2 Assessment of conformity 25

A.5 Test 6.4.4 Power supply test 26
A.5.1 Test 6.4.4.1 Data reporting 26
A.5.2 Assessment of conformity 26
A.5.3 Test 6.4.4.2 Data reporting 26
A.5.4 Assessment of conformity 26
A.6 Test 6.4.5 Sample integrity 26
A.6.1 Calculation of results based on the analysis of variance 26
A.6.2 Notation 26
A.6.3 Calculations 27
A.6.4 Interpretation of the results 28
A.7 Test 6.4.6 Sampler timing error 28
A.7.1 Calculation of elapsed time, timing error and normalization of timing error 28
A.7.2 Assessment of conformity 28
A.8 Test 6.4.7 Ambient air temperature effects 29
A.8.1 Test 6.4.7.2 Volumetric test 29
A.8.2 Assessment of conformity 29
A.8.3 Test 6.4.7.3 Sample temperature control 29

Annex B (informative) Example calculations 30

B.1 General 30
B.2 Test 6.4.1.1 C.T.C.V. Time proportional sampling principle 30
B.2.1 Calculation of sample volume bias and repeatability 30
B.2.2 Assessment of conformity 32
B.3 Test 6.4.1.2 C.T.V.V. flow proportional sampling principle 32
B.3.1 Calculation of sample volume bias and repeatability 32
B.3.2 Assessment of conformity 34
B.4 Tests 6.4.2 Sampling principles 34
B.4.1 Test 6.4.2.2 C.T.C.V. sampling principle 34
B.4.2 Test 6.4.2.3 C.V.V.T. sampling principle (impulse flow signal) 35
B.4.3 Test 6.4.2.4 C.V.V.T. sampling principle (analogue flow signal) 35
B.4.4 Test 6.4.2.5 event triggered sampling 36
B.5 Test 6.4.3 Sample line velocity 36
B.5.1 Data reporting 36
B.5.2 Assessment of conformity 37
B.6 Test 6.4.4 Power supply test 37
B.6.1 Test 6.4.4.1 mains supply samplers 37
B.6.2 Test 6.4.4.2 DC and battery powered samplers 39
B.7 Test 6.4.5 Sample integrity 40
B.7.1 Data reporting, intermediate calculations and an ANOVA calculation 40
B.7.2 Assessment of conformity 41
B.8 Test 6.4.6 Sampler timing error 42
B.8.1 Data reporting 42
B.8.2 Calculation of elapsed time, timing error and normalization of timing error 42
B.8.3 Assessment of conformity 42
B.9 Ambient air temperature effects 42
B.9.1 Volumetric test 6.4.7.2 42
B.9.2 Sample temperature control test 6.4.7.3 44

Annex C (informative) Example procedure for demonstrating sample integrity for samplers to be used for monitoring the performance of urban waste water treatment works45 C.1 General 45

C.2 Waste water 45
C.3 Sample collection 46
C.4 Sample volume 46
C.5 Sample integrity 46
C.6 Determination of conformance 46

Annex D (informative) Example format for the report 47
