

DIN EN 17899:2025-04 (E)

Water quality - Spectrophotometric determination of chlorophyll-a content by ethanol extraction for the routine monitoring of water quality

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Principle	7
5	Interferences	7
6	Reagents	7
7	Apparatus	8
8	Procedure	9
8.1	General	9
8.2	Sample pre-treatment	9
8.3	Filtration	9
8.4	Extraction	9
8.5	Measurement	10
9	Quality assurance	10
9.1	Blank values	10
9.2	pH after acidification	10
9.3	Wavelength setting	10
9.4	Ratio A/A'	11
10	Calculations	11
11	Expression of results	12
12	Test report	12
Annex A (informative) Performance data		13
A.1	Interlaboratory trial study in the Netherlands:	13
A.2	Validation interlaboratory trial in Germany:	13
Annex B (informative) Theoretical backgrounds		16
B.1	Meaning of the determination of the chlorophyll-a content	16
B.2	Acidifying extracts	16
B.3	Calculation of Phaeopigment concentration	16
Annex C (informative) Control samples		17
C.1	Introduction	17

C.2	Surface water	17
C.3	Frozen spinach extracts	17
C.4	Freeze-dried kale	17
C.5	Algae culture	18
Annex D (informative) SCOR-Unesco method for determination of chlorophyll in sea-water		19
D.1	Measurement of chlorophyll a, b, c and d with SCOR-Unesco method using chromatic equations	19
D.2	Performance characteristics and comparison of methods	20
