ISO 10253:2024-07 (E)

Water quality - Marine algal growth inhibition test with Skeletonema sp. and Phaeodactylum tricornutum

Contents

Page

Foreword ..... **iv**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Principle **2**

5 Materials **2**
5.1 Test organisms 2
5.2 Reagents 4
5.2.1 Water 4
5.2.2 Hydrochloric acid or sodium hydroxide solution 4
5.2.3 Synthetic sea water 4
5.2.4 Nutrient stock solution 4

6 Apparatus **5**

7 Procedure **6**
7.1 Preparation of growth medium 6
7.2 Preparation of pre-culture and inoculum 6
7.3 Choice of test concentrations 6
7.4 Preparation of test substance stock solutions 6
7.5 Preparation of test and control batches 7
7.6 Incubation 7
7.7 Measurements 8

8 Validity criteria **8**

9 Interpretation of data **8**
9.1 Plotting growth curves 8
9.2 Calculation of percentage inhibition 8
9.3 Determination of $EC(r)_x$ 9

10 Expression of results **9**

11 Interpretation of results **9**

12 Test report **10**

Annex A (informative) **Preparation of dilution series of mixtures in sea water(effluents or elutriates)** **11**

Annex B (informative) **Test procedure starting from stored algal inocula, and with direct measurement of algal growth in spectrophotometric cells** **12**

Annex C (informative) **Performance data** **18**

Annex D (informative) **Marine algal growth inhibition test with *Phaeodactylum tricornutum* applied in 24-well microwell plates** **19**

Bibliography **26**
