

ISO 24212:2024-09 (E)

Remediation techniques applied at contaminated sites

Contents		Page
Foreword		viii
Introduction		ix
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	Overview	5
5.1	Structure of this document	5
5.2	Generic concepts associated with remediation	6
6	Good practice for carrying out a strategies appraisal prior to implementing remediation strategy	8
6.1	General	8
6.2	Identifying feasible remediation strategies	9
6.3	Detailed evaluation of strategies appraisal	9
6.4	Selecting the final remediation strategy	11
7	Generic recommendations for the selection of remediation techniques	11
7.1	General	11
7.2	Considering the site's context	12
7.3	Remediation set up on-site	13
7.4	Techniques prerequisites	13
7.5	Techniques collateral effects	14
7.6	Laboratory testing and pilot tests	14
8	Generic recommendations for managing hazards and risks during remediation	14
8.1	General	14
8.2	Risk management process	15
8.2.1	General	15
8.2.2	Hazards and controls associated with contaminated soil and groundwater	15
8.2.3	Asbestos	16
8.2.4	Dust	16
8.2.5	Offensive or noxious odours	16
8.2.6	Contaminated waste	16
8.2.7	Remediation equipment	16
8.2.8	Unexpected finds	17
8.2.9	Long-term monitoring	17
8.2.10	Outdoor work	17
8.2.11	Remote or isolated working	17
8.2.12	Underground services and pipelines	17
8.2.13	Ground stability	18
8.2.14	Excavations	18
8.2.15	Unexploded ordnance (UXO)	18
8.2.16	Confined space	18
8.2.17	Hazardous chemicals and dangerous goods	18
8.2.18	Hazardous manual tasks	19

8.2.19	Slips, trips and falls	19
8.2.20	Plant and equipment	19
8.2.21	Noise	19
9	Remediation techniques description	20
9.1	In situ chemical oxidation (ISCO)	20
9.1.1	Technique principle	20
9.1.2	Scope and applicability of the technique (operating window)	20
9.1.3	Technology description	20
9.1.4	Design considerations and dimensioning	20
9.1.5	Key monitoring parameters	21
9.1.6	Advantages and limitations	21
9.1.7	Specific EHS aspects	21
9.1.8	Other techniques or containment approaches that can be combined with the technique ..	22
9.2	In situ chemical reduction (ISCR)	22
9.2.1	Technique principle	22
9.2.2	Scope and applicability of the technique	22
9.2.3	Technology description	22
9.2.4	Design considerations and dimensioning	22
9.2.5	Key monitoring parameters	22
9.2.6	Advantages and limitations	23
9.2.7	Specific EHS aspects	23
9.2.8	Other techniques that can be combined with the technique	23
9.3	Enhanced in situ bioremediation (EISB)	23
9.3.1	Technique principle	23
9.3.2	Scope and applicability of the technique (operating window)	23
9.3.3	Description of technology	24
9.3.4	Design considerations and dimensioning	24
9.3.5	Key monitoring parameters	24
9.3.6	Advantages and limitations	24
9.3.7	Specific EHS aspects	25
9.3.8	Other techniques or containment approaches that can be combined with the technique ..	25
9.4	Monitored natural attenuation (MNA)	25
9.4.1	Technique principle	25
9.4.2	Scope and applicability of the technique (operating window)	25
9.4.3	Description of technology	25
9.4.4	Design considerations and dimensioning	25
9.4.5	Key monitoring parameters	25
9.4.6	Advantages and limitations	26
9.4.7	Specific EHS aspects	26
9.4.8	Other techniques or containment approaches that can be combined with the technique ..	26
9.5	Incineration	26
9.5.1	Technique principle	26
9.5.2	Scope and applicability of the technique	26
9.5.3	Technology description	26
9.5.4	Design considerations and dimensioning	27
9.5.5	Key monitoring parameters	27
9.5.6	Advantages and limitations	27
9.5.7	Specific EHS aspects	28
9.5.8	Other techniques or containment approaches that can be combined with the technique ..	28
9.6	In situ thermal remediation (ISTR)	28
9.6.1	Technique principle	28
9.6.2	Scope and applicability of the technique (operating window)	28
9.6.3	Description of technology	28
9.6.4	Design consideration and dimensioning	29
9.6.5	Key monitoring parameters	29
9.6.6	Advantages and limits	29
9.6.7	Specific EHS aspects	30
9.6.8	Other techniques or containment approaches that can be combined with the technique ..	30
9.7	On-site thermal desorption	30
9.7.1	Technique principle	30

9.7.2	Scope and applicability of the technique (operating window)	30
9.7.3	Technology description	30
9.7.4	Design considerations and dimensioning	30
9.7.5	Key monitoring parameters	31
9.7.6	Advantages and limits	31
9.7.7	Specific EHS aspects	31
9.7.8	Other techniques or containment approaches that can be combined with the technique ..	31
9.8	Soil vapour extraction (SVE)	31
9.8.1	Technique principle	31
9.8.2	Scope and applicability of the technique (operating window)	32
9.8.3	Technology description	32
9.8.4	Design and dimensioning considerations	32
9.8.5	Key monitoring parameters	32
9.8.6	Advantages and limits	33
9.8.7	Specific EHS aspects	33
9.8.8	Other techniques or containment approaches that can be combined with the technique ..	33
9.9	Air-sparging	33
9.9.1	Technique principle	33
9.9.2	Scope and applicability of the technique (operating window)	33
9.9.3	Technology description	34
9.9.4	Design considerations and dimensioning	34
9.9.5	Key monitoring parameters	34
9.9.6	Advantages and limits	34
9.9.7	Specific EHS aspects	34
9.9.8	Other techniques or containment approaches that can be combined with the technique ..	34
9.10	Multi-phase extraction (MPE)	35
9.10.1	Technique principle	35
9.10.2	Scope and applicability of the technique (operating window)	35
9.10.3	Technology description	35
9.10.4	Design considerations and dimensioning	35
9.10.5	Key monitoring parameters	35
9.10.6	Advantages and limitations	36
9.10.7	Specific EHS aspects	36
9.10.8	Other techniques or containment approaches that can be combined with the technique ..	36
9.11	Dual pump liquid extraction (DPLE)	36
9.11.1	Technique principle	36
9.11.2	Scope and applicability of the technique (operating window)	36
9.11.3	Technology description	37
9.11.4	Design considerations and dimensioning	37
9.11.5	Key monitoring parameters	37
9.11.6	Advantages and limitations	37
9.11.7	Specific EHS aspects	37
9.11.8	Other techniques or containment approaches that can be combined with the technique ..	37
9.12	Hydraulic techniques for groundwater remediation	38
9.12.1	Technique principle	38
9.12.2	Scope and applicability of the technique (operating window)	38
9.12.3	Technology description	38
9.12.4	Design considerations and dimensioning	38
9.12.5	Key monitoring parameters	39
9.12.6	Advantages and limitations	39
9.12.7	Specific EHS aspects	39
9.12.8	Other techniques or containment approaches that can be combined with the technique ..	39
9.13	Soil washing	39
9.13.1	Technique principle	39
9.13.2	Scope and applicability of the technique (operating window)	39
9.13.3	Technology description	40
9.13.4	Design and dimensioning considerations	40
9.13.5	Key monitoring parameters	40
9.13.6	Advantages and limitations	40
9.13.7	Specific EHS aspects	40

9.13.8	Other techniques or containment approaches that can be combined with the technique ..	41
9.14	Biopiling	41
9.14.1	Technique principle	41
9.14.2	Scope and applicability of the technique (operating window)	41
9.14.3	Technology description	41
9.14.4	Design considerations and dimensioning	41
9.14.5	Advantages and limitations	42
9.14.6	Key monitoring parameters	42
9.14.7	Specific EHS aspect	42
9.14.8	Other techniques or containment approaches that can be combined with the technique ..	42
9.15	Landfarming	43
9.15.1	Technique principle	43
9.15.2	Scope and applicability of the technique (operating window)	43
9.15.3	Technology description	43
9.15.4	Design considerations and dimensioning	43
9.15.5	Key monitoring parameters	44
9.15.6	Advantages and limitations	44
9.15.7	Specific EHS aspects	44
9.15.8	Other techniques or containment approaches that can be combined with the technique ..	44
9.16	Vertical barrier technologies (VBT)	44
9.16.1	Technique principle	44
9.16.2	Scope and applicability of the technique	45
9.16.3	Technology description	45
9.16.4	Design considerations and dimensioning	45
9.16.5	Key monitoring parameters	45
9.16.6	Advantages and limitations	45
9.16.7	Specific EHS aspects	46
9.16.8	Other techniques or containment approaches that can be combined with the technique ..	46
9.17	Cover systems	46
9.17.1	Technique principle	46
9.17.2	Scope and applicability of the technique	46
9.17.3	Technology description	47
9.17.4	Design considerations and dimensioning	47
9.17.5	Key monitoring parameters	48
9.17.6	Avantages and limitations	48
9.17.7	Specific EHS aspects	48
9.18	Permeable reactive barrier (PRB) systems	49
9.18.1	Technique principle	49
9.18.2	Scope and applicability of the technique (operating window)	49
9.18.3	Technology description	49
9.18.4	Design considerations and dimensioning	49
9.18.5	Key monitoring parameters	49
9.18.6	Advantages and limits	50
9.18.7	Specific EHS aspects	50
9.18.8	Possible combination with other techniques and technique variations	50
9.19	Immobilisation techniques for soil and solid materials	50
9.19.1	Technique principle	50
9.19.2	Scope and applicability of the technique (operating window)	50
9.19.3	Technology description	51
9.19.4	Design and dimensioning considerations	51
9.19.5	Key monitoring parameters	52
9.19.6	Advantages and limitations	52
9.19.7	Specific EHS aspects	53
9.19.8	Other techniques or containment approaches that can be combined with the technique ..	53
9.20	Excavation	53
9.20.1	Technique principle	53
9.20.2	Scope and applicability of the technique (operating window)	53
9.20.3	Description of technology	53
9.20.4	Design considerations and dimensioning	53
9.20.5	Key monitoring parameters	54
9.20.6	Advantages and limitations	54

9.20.7	Specific EHS aspects	54
9.20.8	Other techniques or containment approaches that can be combined with the technique ..	54
9.21	Off-gas treatment technologies and wastewater treatment technologies	54
9.21.1	General	54
9.21.2	Carbon adsorption	55
9.21.3	Off-gas treatment technologies	55
9.21.4	Wastewater treatment technologies	56
Annex A (informative) Remediation techniques, characteristics and conditions of implementation ..		59
Annex B (informative) Remediation techniques suitability for contaminants		63
Annex C (informative) Examples of illustrative diagrams of remediation techniques		71
Bibliography		99
