ISO 12370:2025-01 (E)

Guidelines for treatment and reuse of fermentation-based pharmaceutical wastewater

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and abbreviated terms **1**
3.1 Terms and definitions 1
3.2 Abbreviated terms 2

4 Pollution loading **2**
4.1 Classification of wastewater 2
4.2 Wastewater volume 3
4.3 Quality of produced wastewater 4

5 General principles **4**

6 Wastewater treatment processes **5**
6.1 Pretreatment process 5
6.2 Biological treatment process 6
6.2.1 General 6
6.2.2 Hydrolysis acidification reactor 6
6.2.3 UASB reactor 7
6.2.4 Activated sludge process 7
6.2.5 IFAS process 7

7 Reclamation treatment processes **8**
7.1 General 8
7.2 Denitrification 8
7.3 Activated carbon adsorption 8
7.4 Coagulation precipitation 8
7.5 Membrane separation 9
7.6 High-efficiency sedimentation tank 9
7.7 Ion exchange 9
7.8 MBR 10
7.9 Fenton oxidation 10
7.10 Ozone catalytic oxidation 10
7.11 Ultraviolet disinfection 10

8 Example processes for wastewater treatment and reclamation **10**

Annex A (informative) **Pharmaceutical wastewater quality** **11**

Annex B (informative) **Influent quality for membrane separation** **13**

Annex C (informative) **Examples of treatment and reclamation processes for fermentation-based pharmaceutical wastewater** **14**

Bibliography **17**
