## Water quality - Estimation of measurement uncertainty based on validation and quality control data

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	4
5	Principle .....	5
6	Procedure .....	6
7	Preparative considerations for the estimation of measurement uncertainty .....	6
7.1	Specification of the measurement .....	6
7.2	Specification of the parametric form in which the measurement uncertainty is reported .....	7
8	Evaluation of available data for within-laboratory reproducibility and bias .....	7
8.1	Approach and criteria .....	7
8.2	Within-laboratory reproducibility .....	8
8.2.1	General .....	8
8.2.2	Quality control samples covering the whole analytical process .....	9
8.2.3	Using standard solutions and replicates of test samples .....	9
8.2.4	No stable quality control samples .....	10
8.3	Bias .....	10
8.3.1	General .....	10
8.3.2	Analysis of suitable reference materials .....	11
8.3.3	Participation in interlaboratory comparisons .....	12
8.3.4	Recovery experiments .....	13
9	Calculation of the combined standard uncertainty .....	15
10	Calculation of the expanded uncertainty .....	16
11	Initial estimation of measurement uncertainty from reproducibility standard deviation .....	16
12	Report .....	16
Annex A (informative)	Division of the measurement range into two parts -- Constant absolute and constant relative uncertainties .....	17
Annex B (normative)	Estimation of the pooled standard deviation from replicate measurements .....	24
Annex C (informative)	Examples of the estimation of measurement uncertainty .....	25
Bibliography .....		38
