DIN EN 13476-3:2026-06 (E)

Plastics piping systems for non-pressure underground drains and sewers - Structured-wall piping systems of unplasticized poly(vinyl chloride) (PVC-U), polypropylene (PP) and polyethylene (PE) - Part 3: Specifications for pipes and fittings with smooth internal and profiled external surface and the system, Type B

1 Scope 8

2 Normative references 8

3 Terms and definitions 10

4 Symbols and abbreviations 11
4.1 Symbols 11
4.2 Abbreviations 12

5 Material 12
5.1 General 12
5.2 Unplasticized poly(vinyl chloride) (PVC-U) 12
5.2.1 General 12
5.2.2 Formulation characteristics of pipe and fitting 13
5.3 Polypropylene (PP) 14
5.3.1 General 14
5.3.2 Compound characteristics for pipe and fitting 14
5.3.3 Melt mass-flow rate classification 15
5.4 Polyethylene (PE) 16
5.4.1 General 16
5.4.2 Compound characteristics of pipes and injection-moulded fittings 16
5.4.3 Compound characteristics of rotational-moulded fittings 17
5.5 Sealing ring retaining components 18
5.6 Sealing rings 19
5.7 Fused or welded joints 19
5.8 Adhesives for PVC-U 19

6 Designation of wall constructions and examples of typical jointing methods 19
6.1 General 19
6.2 Wall constructions designated as Type B 19
6.2.1 Ribbed or corrugated construction 19
6.2.2 Typical jointing methods for structured-wall type B 22
6.3 Designation and design of joints 24

7 Appearance and colour 24

8 Geometrical characteristics 24
8.1 General 24
8.2 Dimensions 24
8.2.1 Designation 24
8.2.2 Lengths of pipe 24
8.2.3 Diameters of Type B pipes and spigots of pipes or fittings 24
8.2.4 Diameters and jointing dimensions of sockets and spigots 28
8.2.5 Wall thicknesses 28
8.3 Types of fittings 30

8.4 Design length of fittings 31

9 Physical characteristics 31
9.1 Unplastisized poly(vinyl chloride) (PVC-U) 31
9.1.1 Physical characteristics of PVC-U pipes 31
9.1.2 Physical characteristics of PVC-U fittings 32
9.2 Polypropylene (PP) 32
9.2.1 Physical characteristics of PP pipes 32
9.2.2 Physical characteristics of PP fittings 33
9.3 Polyethylene (PE) 33
9.3.1 Physical characteristics of PE pipes 33
9.3.2 Physical characteristics of PE fittings 34

10 Mechanical characteristics 34
10.1 Mechanical characteristics of pipes 34
10.1.1 General requirements 34
10.1.2 Ring flexibility 36
10.1.3 Tensile strength 37
10.2 Mechanical characteristics of fittings 37

11 Performance requirements 38

12 Marking 40
12.1 General 40
12.2 Minimum required marking 40
12.2.1 Pipes 40
12.2.2 Fittings 42
12.3 Additional marking 42

Annex A (normative) Formulation PVC-U material 43

Annex B (normative) Utilization of PVC-U recyclates 44

B.1 General 44
B.2 Agreed specification 44
B.3 Additional specifications for recyclate and agreed specifications 45

Annex C (normative) Compound PP material 47

Annex D (normative) Utilization of PP recyclate 48

D.1 General 48
D.2 Agreed specification 48
D.3 Additional specifications for recyclate and agreed specification 49

Annex E (normative) Compound PE material 51

Annex F (normative) Utilization of PE recyclate 52

F.1 General 52
F.2 Agreed specification 52
F.3 Additional specifications for recyclate and agreed specification 53

Annex G (normative) Impact test at 23 °C 55

Annex H (normative) Impact test at -10 °C 56

Annex I (normative) Ring flexibility test at 20 % diametric deflection 57

Annex J (normative) Impact test for large diameter pipes with structured wall 58

J.1 Principle 58

J.2 Apparatus 58
J.3 Test samples 59
J.4 Conditioning 59
J.5 Procedure 59
J.6 Test result 60
