DIN EN 901:2026-03 (E)

Chemicals used for treatment of water intended for human consumption - Sodium hypochlorite

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Description 6
4.1 Identification 6
4.2 Commercial form 7
4.3 Physical properties 7
4.3.1 Appearance and odour 7
4.3.2 Density 7
4.3.3 Solubility in water 7
4.3.4 Vapour pressure 7
4.3.5 Boiling point at 100 kPa 7
4.3.6 Crystallization and freezing point 7
4.3.7 Specific heat 7
4.3.8 Viscosity (dynamic) 7
4.3.9 Critical temperature 8
4.3.10 Critical pressure 8
4.3.11 Physical hardness 8
4.4 Chemical properties 8

5 Purity criteria 8
5.1 General 8
5.2 Composition of commercial product 8
5.3 Impurities and main by-products 8
5.4 Chemical parameters 9

6 Test methods 9
6.1 Sampling 9
6.2 Analysis 10
6.2.1 Determination of available chlorine content (main product) 10
6.2.2 Impurities 12
6.2.3 Chemical parameters 17

7 Labelling - transportation - storage 19
7.1 Product labelling 19
7.2 Labelling 20
7.3 Storage 21
7.3.1 General information 21
7.3.2 Long term stability 21
7.3.3 Impermissible storage conditions 21
7.4 Transportation and labelling 21

Annex A (informative) General information on sodium hypochlorite 22

Annex B (informative) General rules relating to safety 25

Annex C (normative) Determination of arsenic, antimony and selenium (atomic absorption spectrometry hydride technique) 26

Annex D (informative) Determination of bromate ion content in sodium hypochlorite by liquid chromatography of ions and UV detection 33

Annex E (informative) Results of inter-laboratory tests on sodium bromate determination in sodium hypochlorite commercial solutions 37
