DIN EN 18069:2026-09 (E)

Water quality - Minimum requirements for the selection, installation, validation, and operation of continuous measuring devices

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Selection, installation, validation and operation of continuous measuring devices 10
4.1 General 10
4.2 Selection 11
4.2.1 Selection procedure 11
4.2.2 Scope of the user requirements (UR) document 11
4.2.3 Normative references and regulatory requirements 12
4.2.4 Measuring point 12
4.2.5 Infrastructure 12
4.2.6 Environmental conditions 13
4.2.7 Supporting functionalities 13
4.2.8 Calibration and/or adjustment 13
4.2.9 Maintenance operations 14
4.2.10 Data analysis 14
4.2.11 Review process 14
4.3 Installation and verification 15
4.4 Validation 16
4.5 Operation 16
4.5.1 General 16
4.5.2 Calibration / adjustment 17
4.5.3 Maintenance 18
4.5.4 Quality Controls (QC) 19
4.5.5 Post processing of data 20
4.5.6 Document traceability 21

Annex A (informative) Questionnaire relative to the characteristics of a measuring point for water monitoring - example 22

Annex B (informative) Example of calibration criteria, verification procedure and measurement standards for continuous measuring stations for surface water quality monitoring 24

B.1 Calibration criteria 24
B.2 Calibration verification procedure 24
B.3 Measurement standards for calibration and/or adjustment 25
B.3.1 General 25
B.3.2 Types of measurement standard 25
B.3.3 Number and nominal values of the measurement standards 27

Annex C (informative) Method of correcting drifts and examples of data post-processing 28

C.1 Method of correcting drifts based on USGS (2006) 28
C.2 Data confidence index 29
