ISO 21622-1:2026-04 (E)

Irrigation techniques - Remote monitoring and control for irrigation - Part 1: General considerations

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Remote monitoring and control system (RMCS) type, classification and characterization **5**
4.1 General 5
4.2 Field 1: RMCS type 5
4.2.1 General 5
4.2.2 Type 0 RMCS (Type0) 5
4.2.3 Type 1 RMCS (Type1) 5
4.2.4 Type 2 RMCS (Type2) 6
4.2.5 Type 3 RMCS (Type3) 6
4.3 Field 2: RMCS classification 6
4.4 Field 3: RMCS characterization 7

5 RMCS design parameters **9**
5.1 General 9
5.2 General criteria 9
5.3 Environmental robustness 9
5.4 Architecture 10
5.4.1 General 10
5.4.2 Data availability 11
5.4.3 Time required for discrete actuations 11
5.5 Communication technologies and protocols 11
5.6 Communication interfaces 12
5.7 Signal connections 12
5.8 Data transmission modes 12
5.8.1 General 12
5.8.2 Devices unable to initiate data transmission 12
5.8.3 Devices able to initiate data transmission 12
5.9 Power supply 13
5.10 Runtime 13
5.11 Supported sensors and actuators 13
5.12 Wiring specifications 14
5.12.1 General requirements 14
5.12.2 Wire sizing 14
5.12.3 For analog inputs and outputs 14
5.12.4 For field buses 14
5.13 Safety 14
5.14 Electromagnetic compatibility (EMC) requirements 14

6 RMCS specifications **15**
6.1 System specifications 15
6.1.1 General 15
6.1.2 Requirements 15
6.1.3 Recommendations 15
6.2 Hardware specifications for controllers developed for irrigation 15
6.2.1 Requirements 15

6.2.2 Recommendations 16
6.3 Supervisory and control software specifications 16
6.3.1 General 16
6.3.2 Requirements 16
6.3.3 Recommendations 16
7 Documentation 17
Bibliography 18
