

ISO 15705:2002-11 (E)

Water quality - Determination of the chemical oxygen demand index (ST-COD) - Small-scale sealed-tube method

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 Principle		2
5 Interferences		2
6 Reagents		2
7 Apparatus		5
8 Sample collection and preservation		6
9 Preparation of tubes and instrument set-up		6
10 Analytical procedure for measurement of samples		7
11 Calculation of results		8
12 Expression of results		9
13 Test report		9
14 Precision		9
Annex A (informative) Comparison between the COD method according to ISO 6060 and the method described in this International Standard		10
Annex B (informative) Hazards		11
Annex C (informative) Information on the use of commercial small-scale ST-COD test kits utilizing photometric detection		12
Annex D (informative) Low-range sealed-tube photometric method (up to 150 mg/l)		13
Annex E (informative) Low-range sealed-tube titrimetric method (up to 150 mg/l)		14
Annex F (informative) Screening test for samples with high chloride concentrations		15
Annex G (informative) Precision data		16
Bibliography		18
