DIN EN ISO 16665:2006-02 (E)

Water quality - Guidelines for quantitative sampling and sample processing of marine soft-bottom macrofauna (ISO 16665:2005)

Contents

Page

Foreword 2

Introduction 4

1 Scope 5

2 Terms and definitions 6

3 Quality and safety 7
3.1 Health and safety requirements 7
3.2 Quality assurance and quality control 8

4 Strategies and objectives for soft-bottom faunal surveys 9
4.1 Sampling programme and plan 9
4.2 Positioning of sampling stations 9
4.3 Reference stations 10
4.4 Types of surveys 10
4.5 Change in sampling programme and intercalibration 14

5 Sampling 14
5.1 Documentation and field log 14
5.2 Sampling and sample processing in the field 15
5.3 Sample fixation 19
5.4 Background environmental descriptors 19

6 Sample processing in the laboratory 22
6.1 Sorting 22
6.2 Sample residue 22

7 Taxon determination and quantification 23
7.1 Level of identification and taxon lists 23
7.2 Quantification 23
7.3 Reference collection (see also 7.7.8) 24
7.4 Biomass 24
7.5 Data reporting 24
7.6 Storage and archiving 25
7.7 Analytical quality control and quality assurance 25

Annex A (informative) Processing particularly large samples 28

Annex B (informative) Sampling devices 29

Annex C (informative) Biomass measurements 31
