DIN EN 14049:2006-01 (E)

Irrigation techniques - Water application intensity - Calculation principles and measurement methods

Contents

Page

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Calculation methods related to water application intensity 6
4.1 Depth of water application 6
4.2 Water application intensity (WAI) 6
4.2.1 General 6
4.2.2 Instantaneous water application intensity 6
4.2.3 Average water application intensity 7
4.2.4 Average WAI for a solid set of stationary sprinklers 7
4.2.5 Average WAI for full circle sprinklers on moving systems 8
4.2.6 Average WAI for part circle sprinkler on moving systems 12

5 Measurement methods for water application intensity 13
5.1 General 13
5.2 Average water application intensity 13
5.2.1 General 13
5.2.2 Case of fixed sprinklers 13
5.2.3 Case of moving machines 15
5.2.4 Case of sprinklers attached to a stationary machine 16
5.3 Local "instantaneous" water application intensity 17
5.3.1 General 17
5.3.2 Measurement method 17
5.3.3 Interpretation 17
