

# DIN EN ISO 19458:2006-12 (E)

## Water quality - Sampling for microbiological analysis (ISO 19458:2006)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		2
Introduction .....		4
1 <b>Scope</b> .....		5
2 <b>Normative references</b> .....		5
3 <b>Sampling point</b> .....		5
4 <b>Sampling technique</b> .....		6
5 <b>Transport and storage</b> .....		14
<b>Annex A (informative) A priori determination of the number of samples to analyse to determine the mean concentration of microbes in water with a given confidence, for quantitative determination derived by cultivation of microorganisms</b> .....		17
<b>Annex B (informative) Recommended (R) and acceptable (A) values for maximum sample storage times including transport time and temperatures unless otherwise specified in specific standards</b> .....		20
<b>Bibliography</b> .....		21
