Water quality - Guidance for establishing the equivalency of results

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Overview of the different approaches		2
5 Amount of data		2
6 Data comparisons		3
7 Comparison of arithmetic means of two independently obtained sets of data		3
8 Comparison of population and sample arithmetic means		4
9 Analysis of variance		5
10 Determination of the equivalence of analytical results obtained from samples from different matrices		7
10.1 General		7
10.2 Determination of the equivalence of the analytical results of real samples using orthogonal regression		7
10.3 Evaluation according to the difference method		9
11 Reporting		10
Annex A (informative) Statistical tables		11
Annex B (informative) Example of a comparison of arithmetic means of two independently obtained sets of data		13
Annex C (informative) Example of a comparison of population and sample arithmetic means		15
Annex D (informative) Example of an analysis of variance		16
Annex E (informative) Examples of a comparison of results from samples of different matrices		18
Annex F (informative) Illustrative examples of graphic plots		24
Annex G (informative) Schematic diagrams		27
Bibliography		29
