Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 5

5 Sample preparation and storage 6

6 Method A -- Drying at 105 °C 6

7 Method B -- Direct Karl-Fischer-titration (volumetric/coulometric detection) 8

8 Performance characteristics 10

9 Calculation of dry matter 11

10 Test report 12

Annex A (informative) Additional validation data 13

Annex B (informative) Azeotropic distillation with toluene 16

Annex C (informative) Summary of general requirements and recommendations 20
