

# DIN EN 14346:2007-03 (E)

## Characterization of waste - Calculation of dry matter by determination of dry residue or water content

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1 <b>Scope</b> .....		5
2 <b>Normative references</b> .....		5
3 <b>Terms and definitions</b> .....		5
4 <b>Principle</b> .....		5
5 <b>Sample preparation and storage</b> .....		6
6 <b>Method A -- Drying at 105 °C</b> .....		6
7 <b>Method B -- Direct Karl-Fischer-titration (volumetric/coulometric detection)</b> .....		8
8 <b>Performance characteristics</b> .....		10
9 <b>Calculation of dry matter</b> .....		11
10 <b>Test report</b> .....		12
<b>Annex A (informative) Additional validation data</b> .....		13
<b>Annex B (informative) Azeotropic distillation with toluene</b> .....		16
<b>Annex C (informative) Summary of general requirements and recommendations</b> .....		20
