

DIN EN ISO 5667-1:2007-04 (E)

Water quality - Sampling - Part 1: Guidance on the design of sampling programmes and sampling techniques (ISO 5667-1:2006)

Contents		Page
Foreword		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	General safety precautions	6
5	Design of sampling programmes	7
5.1	General	7
5.2	Broad objectives for the design of sampling programmes	7
5.3	Specific considerations in relation to variability	9
5.4	Identifying the sampling location	9
6	Characteristics and conditions affecting sampling	10
7	Sampling from specific types of water	10
7.1	Natural waters	10
7.2	Processed waters	11
8	Time and frequency of sampling	12
8.1	General	12
8.2	Water quality management programmes	13
8.3	Quality characterization programmes	13
8.4	Programmes for investigation of causes of contamination	13
8.5	Statistical considerations	13
8.6	Duration of sampling occasion and composite samples	16
9	Flow measurements and situations justifying flow measurements for water quality purposes	16
9.1	General	16
9.2	Direction of flow	16
9.3	Velocity of flow	17
9.4	Discharge rate	17
9.5	Flow structure	17
9.6	Cross-sectional area	17
9.7	Justification for flow measurements in water quality control management	17
9.8	Methods available for flow measurement	18
10	Sampling techniques	19
10.1	General	19
10.2	Spot samples	19
10.3	Periodic samples (discontinuous)	20
10.4	Continuous samples	20
10.5	Series sampling	21
10.6	Composite samples	21
10.7	Large-volume samples	21
11	Sampling equipment	21

11.1	General	21
11.2	Types of sample container	22
12	Sampling equipment for physical or chemical characteristics	23
12.1	General	23
12.2	Equipment for spot sampling	24
12.3	Grabs or dredges for sampling sediment	24
12.4	Core samplers	24
12.5	Sampling equipment for dissolved gases and volatile materials	24
12.6	Sampling equipment for radioactivity characteristics	25
12.7	Sampling equipment for biological and microbiological characteristics	25
12.8	Automatic sampling equipment	25
12.9	Preparation of sampling equipment	26
13	Avoidance of contamination	27
13.1	General	27
13.2	Sources of contamination	27
13.3	Control of contamination	28
14	Transport to, and storage of samples at, the depot or laboratory	28
15	Sample identification and records	29
15.1	General	29
15.2	Samples that might be used for legal purposes	29
	Annex A (informative) Diagrams illustrating types of periodic and continuous samples	31
	Bibliography	34
