DIN EN 14154-2:2007-07 (E)

Water meters - Part 2: Installation and conditions of use (includes Amendment A1:2007)

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Criteria for the selection of water meters 5
4.1 General considerations 5
4.2 Information to be provided by the manufacturer 5
4.3 Meters operating in parallel or in a group 5

5 Installation requirements 6
5.1 Compliance with specified metrological characteristics 6
5.1.1 General 6
5.1.2 Meter operating position 6
5.1.3 Hydraulic disturbances 7
5.1.4 Water quality (suspended particles) 8
5.1.5 Electromagnetic meters 8
5.1.6 Meters operating in parallel or in a group 9
5.2 Protection of the meter 9
5.2.1 General considerations 9
5.2.2 Frost 9
5.2.3 Shock or vibration either transmitted from or induced by the installation 9
5.2.4 Reverse water flow 10
5.2.5 Installation induced stress and unbalance 10
5.2.6 Intentional fraud 10
5.3 Safety of personnel and users 10
5.3.1 General 10
5.3.2 Pipework anchoring 11
5.3.3 Manhole installation 11
5.3.4 Installations Requirements for pipes greater than DN 40 11
5.3.5 Protection against hazard related to electrical installations 11
5.4 Comfort of personnel 11
5.4.1 Access to the water meter and fittings 11
5.4.2 Associated fittings 12
5.5 Ease of reading 12

6 First operation of new or repaired water meters 13
6.1 General considerations 13
6.2 Meters operating in parallel or in group 13

Annex A (informative) Examples of Concentric Manifold Solutions 14

Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 22/2004/EC on Measuring Instruments 16
