ISO 19349:2019 (E)

Plain bearings with liquid lubrication — Lubricant supply arrangements and monitoring

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Lubrication arrangements

4.1 Self-contained bearings
4.2 Circulated lubrication (forced lubrication)
4.2.1 General
4.2.2 Oil feed and oil return
4.2.3 Oil reservoirs
4.3 Hydrostatic lubrication

5 Lubricants

5.1 Suitable lubricants for plain bearings
5.2 Oil cleanliness

6 Lubricant heating

7 Monitoring

7.1 Requirements for design or selection of the lubrication monitoring system
7.2 Requirements for through-life operation of the overall bearing and lubrication system
