ISO 4386-2:2019 (E)

Plain bearings — Metallic multilayer plain bearings — Part 2: Destructive testing of bond for bearing metal layer thicknesses greater than or equal to 2 mm

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Test equipment

5.1 General
5.2 Testing apparatus

6 Specimen

6.1 General
6.2 Specimen machining sequence

7 Procedure

8 Evaluation

8.1 General
8.2 Designation
8.3 Test report

9 Application for quality control and process qualification

9.1 General
9.2 Quality control
9.3 Process qualification
