Plain bearings — Appearance and characterization of damage to metallic hydrodynamic bearings — Part 2: Cavitation erosion and its countermeasures

Contents

	Foreword	
	Introduction	
1	Scope	
2	Normative references	
3	Terms and definitions	
4	Cavitation erosion	
4.1	Mechanism of cavitation erosion	
4.2	Classification of cavitation erosion	
4.3	General countermeasures against cavitation erosion	
5	Five types of cavitation erosion	
5.1	General	
5.2	Flow cavitation erosion	
5.2.1	Typical damage appearance	
5.2.2	Possible causes	
5.2.3	Possible countermeasures	
5.2.4	Typical examples (see Figures 4 to 8)	
5.3	Impact cavitation erosion	
5.3.1	Typical damage appearance	
5.3.2	Possible damage causes	
5.3.3	Possible countermeasures	
5.3.4	Typical examples (see Figures 9 to 11)	
5.4	Suction cavitation erosion	
5.4.1	Typical damage appearance	
5.4.2	Possible causes	
5.4.3	Possible countermeasures	
5.4.4	Typical examples (see Figures 12 to 14)	
5.5	Discharge cavitation erosion	
5.5.1	Typical damage appearance	
5.5.2	Possible causes	
5.5.3	Possible countermeasures	
5.5.4	Typical examples (see Figures 15 to 16)	
5.6	Miscellaneous cavitation erosion (see Figures 17 to 20)	
5.6.1	Cavitation erosion caused by high-frequency vibration (“Vibration cavitation”)	
5.6.2	Cavitation erosion by elastic bearing deformation or abnormal combustion	
5.6.3	Rippling or roughening (see Figures 19 and 20)
