ISO 7544:2024-09 (E)

Rolling bearings - Test and assessment methods for cleanliness

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 2

5 Main steps of cleanliness inspection 2

6 Equipment and accessories 3
6.1 Equipment for extraction 3
6.1.1 Equipment for pressure-rinsing method 3
6.1.2 Equipment for ultrasonic method 4
6.2 Equipment for filtration 5
6.3 Auxiliary accessories 7
6.4 Equipment for analysis 8
6.4.1 Gravimetry 8
6.4.2 Light-optical analysis 8

7 Blank value 8

8 Test lot 8
8.1 General 8
8.2 Test lot size 8

9 Extraction 9
9.1 General 9
9.2 Test fluid 9
9.3 Pressure-rinsing method 9
9.3.1 General 9
9.3.2 Parameters for pressure-rinsing extraction 9
9.3.3 Procedure for pressure-rinsing extraction 10
9.4 Ultrasonic method 10
9.4.1 General 10
9.4.2 Parameters for ultrasonic extraction 10
9.4.3 Procedure for ultrasonic extraction 11

10 Filtration and drying 11
10.1 General 11
10.2 Analysis filter 11
10.3 Procedure for filtration 11
10.4 Procedure for drying 12

11 Analysis 12
11.1 Gravimetry 12
11.2 Light-optical analysis 12

12 Test report 13

13 Escalation 13

Annex A (informative) Explanations on "cleanliness" of rolling bearings 14

Annex B (informative) Pressure-rinsing parameters 19

Annex C (informative) Occupational health, safety and environment 21

Annex D (informative) Example of a test report 22

Annex E (informative) Escalation strategy 23

Bibliography 24
