## Rolling bearings - Test and assessment methods for cleanliness

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....                                      | 1           |
| 2                  | Normative references .....                       | 1           |
| 3                  | Terms and definitions .....                      | 1           |
| 4                  | Symbols and abbreviated terms .....              | 2           |
| 5                  | Main steps of cleanliness inspection .....       | 2           |
| 6                  | Equipment and accessories .....                  | 3           |
| 6.1                | Equipment for extraction .....                   | 3           |
| 6.1.1              | Equipment for pressure-rinsing method .....      | 3           |
| 6.1.2              | Equipment for ultrasonic method .....            | 4           |
| 6.2                | Equipment for filtration .....                   | 5           |
| 6.3                | Auxiliary accessories .....                      | 7           |
| 6.4                | Equipment for analysis .....                     | 8           |
| 6.4.1              | Gravimetry .....                                 | 8           |
| 6.4.2              | Light-optical analysis .....                     | 8           |
| 7                  | Blank value .....                                | 8           |
| 8                  | Test lot .....                                   | 8           |
| 8.1                | General .....                                    | 8           |
| 8.2                | Test lot size .....                              | 8           |
| 9                  | Extraction .....                                 | 9           |
| 9.1                | General .....                                    | 9           |
| 9.2                | Test fluid .....                                 | 9           |
| 9.3                | Pressure-rinsing method .....                    | 9           |
| 9.3.1              | General .....                                    | 9           |
| 9.3.2              | Parameters for pressure-rinsing extraction ..... | 9           |
| 9.3.3              | Procedure for pressure-rinsing extraction .....  | 10          |
| 9.4                | Ultrasonic method .....                          | 10          |
| 9.4.1              | General .....                                    | 10          |
| 9.4.2              | Parameters for ultrasonic extraction .....       | 10          |
| 9.4.3              | Procedure for ultrasonic extraction .....        | 11          |
| 10                 | Filtration and drying .....                      | 11          |
| 10.1               | General .....                                    | 11          |
| 10.2               | Analysis filter .....                            | 11          |
| 10.3               | Procedure for filtration .....                   | 11          |
| 10.4               | Procedure for drying .....                       | 12          |
| 11                 | Analysis .....                                   | 12          |
| 11.1               | Gravimetry .....                                 | 12          |
| 11.2               | Light-optical analysis .....                     | 12          |

|    |   |    |
|----|---|----|
| 12 | Test report .....   | 13 |
| 13 | Escalation .....  | 13 |
|    | Annex A (informative) Explanations on "cleanliness" of rolling bearings ..... | 14 |
|    | Annex B (informative) Pressure-rinsing parameters .....                       | 19 |
|    | Annex C (informative) Occupational health, safety and environment .....       | 21 |
|    | Annex D (informative) Example of a test report .....                          | 22 |
|    | Annex E (informative) Escalation strategy .....                               | 23 |
|    | Bibliography .....  | 24 |
