ISO 4378-3:2024-11 (E)

Plain bearings - Terms, definitions, classification and symbols - Part 3: Lubrication

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1
3.1 General terms 1
3.2 Terms related to the types of lubrication and classification 1
3.2.1 Classification according to physical state of the lubricant 1
3.2.2 Classification according to the mechanism of separation of the interacting surfaces by a lubricant film 2
3.2.3 Calculation model for the EHD and THD lubrication condition 3
3.3 Terms related to methods of lubrication and classification 4
3.3.1 Classification according to periodicity of application of lubricant 4
3.3.2 Classification according to the methods of renewing the lubricant 4
3.3.3 Classification according to the method of application of the lubricant to the friction surface 4
3.4 Terms related to lubricants, their components and types 12
3.4.1 Terms related to type according to the physical state of lubricant 12
3.4.2 Terms related to type according to the presence of additive 12
3.4.3 Terms related to type according to the origin of lubricant 13
3.4.4 Terms related to type according to the type of additive 13
3.4.5 Terms related to type according to the application of lubricant 15
3.5 Basic characteristics of lubricants 15
