

DIN EN ISO 11439:2013-09 (E)

Gas cylinders - High pressure cylinders for the on-board storage of natural gas as a fuel for automotive vehicles (ISO 11439:2013)

Contents		Page
Foreword		
Introduction		
1	Scope	
2	Normative references	
3	Terms and definitions	
4	Service conditions	
4.1	General	
4.2	Maximum pressures	
4.3	Design number of filling cycles	
4.4	Temperature range	
4.5	Gas composition	
4.6	External surfaces	
5	Inspection and testing	
6	Type approval procedure	
6.1	General	
6.2	Type approval	
6.3	Statement of service	
6.4	Design data	
6.5	Manufacturing data	
6.6	Fracture performance and non-destructive examination (NDE) defect size	
6.7	Specification sheet	
6.8	Additional supporting data	
6.9	Type approval certificate	
7	Requirements for type 1 metal cylinders	
7.1	General	
7.2	Materials	
7.3	Design Requirements	
7.4	Construction and workmanship	
7.5	Prototype testing procedure	16
7.6	Batch tests	18
7.7	Tests on every cylinder	
7.8	Batch acceptance certificate	
7.9	Failure to meet test requirements	
8	Requirements for type 2 hoop-wrapped cylinders	
8.1	General	
8.2	Materials	
8.3	Design requirements	
8.4	Construction and workmanship	
8.5	Prototype testing procedure	
8.6	Batch tests on liners and cylinders	27
8.7	Tests on every liner and cylinder	
8.8	Batch acceptance certificate	

8.9	Failure to meet test requirements	
9	Requirements for type 3 fully-wrapped cylinders	
9.1	General	
9.2	Materials	
9.3	Design requirements	
9.4	Construction and workmanship	
9.5	Prototype testing procedure	36
9.6	Batch tests on liners and cylinders	
9.7	Tests on every liner and cylinder	
10	10 11 11 11 11 13 13 13 13 13 13 13 14 14 15 20 20 20 21 21 21 22 525 30 31 31 32 32 32 33 41 40 9.8 Batch acceptance certificate	
9.9	Failure to meet test requirements	
10	Requirements for type 4 fully-wrapped composite cylinders	
10.1	General	
10.2	Materials	
10.3	Design requirements	
10.4	Construction and workmanship	
10.5	Prototype testing procedure	45
10.6	Batch tests	
10.7	Tests on every cylinder	
10.8	Batch acceptance certificate	
10.9	Failure to meet test requirements	
11	Marking	54
12	Preparation for dispatch	55
	Annex A (normative) Test methods and criteria	56
	Annex B (normative) Ultrasonic examination	65
	Annex C (informative) Non-destructive examination (NDE) defects size by flawed cylinder cycling	69
	Annex D (informative) Report forms	
	Annex E (informative) Standard working pressures	
	Annex F (informative) Verification of stress ratios using strain gauges	
	Annex G (informative) Manufacturer's instructions for handling, use and inspection of cylinders	75
