DIN EN 13110:2019-03 (E)

LPG equipment and accessories - Transportable refillable welded aluminium cylinders for liquef ied petroleum gas (LPG) - Design and construction (includes Amendment :2017)

Contents

Page

European foreword 5

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms, definitions and symbols 8
3.1 Terms and definitions 8
3.2 Symbols 9

4 Materials 9

5 Design 11
5.1 General requirements 11
5.2 Calculation of cylindrical wall thickness 11
5.3 Design of ends concave to pressure 11
5.4 Other shapes of ends 12
5.5 Minimum wall thickness 12
5.6 Design of openings 12
5.7 Neck design 13
5.8 Stability 17
5.9 Valve protection 17

6 Construction and workmanship 17
6.1 Environment 17
6.2 Welding qualification 17
6.3 Plates and pressed parts 18
6.4 Welded joints 18
6.5 Tolerances 18
6.6 Non-pressure bearing attachments 18
6.7 Heat treatment 19
6.8 Closure of openings 19

7 Testing and examination 20
7.1 General 20
7.2 Types of test and evaluation of test results 20
7.3 Test specimens and related tests and examinations 21
7.3.1 Two piece cylinders 21
7.3.2 Three piece cylinders 21
7.3.3 Valve boss welds 21
7.4 Tensile test 23
7.4.1 General 23
7.4.2 Parent material 23
7.4.3 Welds 23
7.5 Bend test 23
7.5.1 Bend test on parent material 23
7.5.2 Bend test across the welds 24

7.5.3 Nick-break test across the welds 24
7.6 Macroscopic examination of welds 26
7.6.1 Procedure 26
7.6.2 Requirements 26
7.7 Burst test under hydraulic pressure 27
7.7.1 Procedure 27
7.7.2 Requirements 28
7.8 Fatigue test 28
7.8.1 Procedure 28
7.8.2 Requirements 29
7.9 Drop test 29
7.9.1 Procedure 29
7.9.2 Requirements 29
7.10 Visual examination 29
7.10.1 Procedure 29
7.10.2 Requirements 29
7.11 Radiographic examination 30
7.11.1 Procedure 30
7.11.2 Assessment 30
7.11.3 Requirements 30
7.12 Pressure test 30
7.12.1 Procedure 30
7.12.2 Requirements 30

8 Technical requirements for type approval 32
8.1 New cylinder design 32
8.2 Extent of testing 32
8.3 Type approval certificate 33

9 Production testing and examination requirements 33
9.1 Tests and examinations applicable to all cylinders 33
9.2 Radiographic examination 34
9.3 Macro examination 34
9.4 Examination of valve boss weld 34
9.5 Examination of non-pressure containing attachment welds 34
9.6 Unacceptable imperfections found by radiographic or macro examinations 34
9.7 Production batch testing (mechanical/burst tests) 35
9.7.1 Production batch 35
9.7.2 Inspection lots 36
9.7.3 Rate of sampling 36
9.7.4 Additional checks 36
9.8 Failure to meet mechanical and burst test requirements 37
9.8.1 Mechanical 37
9.8.2 Burst 37
9.8.3 Production batch retest 37
9.8.4 Resubmission of a production batch 37
9.8.5 Weld repairs 38

10 Marking 38

11 Certificate of Conformity 38

Annex A (normative) Corrosion tests 39

A.1 Test for assessing susceptibility to intercrystalline corrosion 39
A.1.1 Specimens 39
A.1.2 Pre-treatment of the specimen before corrosive etching 39
A.1.2.1 Chemicals required 39
A.1.2.2 Method 39
A.1.3 Corrosive etching process 40

A.1.3.1 Chemicals required 40
A.1.3.2 Method 40
A.1.4 Preparation of specimens for examination 41
A.1.4.1 Method 41
A.1.5 Micrographic examination of specimens 41
A.1.6 Interpretation of the micrographic examination 41
A.2 Tests for assessing susceptibility to stress corrosion 41
A.2.1 Specimens 41
A.2.2 Surface preparation before test 41
A.2.3 Method 42
A.2.3.1 Preparation of the corrosive solution 42
A.2.3.2 Applying the stress to the specimen 44
A.2.4 Interpretation of the results 46
A.2.5 Metallographical examination (additional examination) 46
A.3 Conclusion of corrosion tests 46
A.4 Test report 46
