| European foreword..... |  | 4           |
| Foreword.....          |  | 5           |
| Introduction.....      |  | 6           |
| <b>1</b>               | <b>Scope</b> .....                                       | <b>7</b>    |
| <b>2</b>               | <b>Normative references</b> .....                        | <b>7</b>    |
| <b>3</b>               | <b>Terms and definitions</b> .....                       | <b>7</b>    |
| <b>4</b>               | <b>Symbols</b> .....                                     | <b>9</b>    |
| <b>5</b>               | <b>Inspection and testing</b> .....                      | <b>10</b>   |
| <b>6</b>               | <b>Materials</b> .....                                   | <b>10</b>   |
|                        | 6.1 General requirements.....                            | 10          |
|                        | 6.2 Controls on chemical composition.....                | 11          |
|                        | 6.3 Heat treatment.....                                  | 12          |
|                        | 6.4 Failure to meet test requirements.....               | 12          |
| <b>7</b>               | <b>Design</b> .....                                      | <b>13</b>   |
|                        | 7.1 General requirements.....                            | 13          |
|                        | 7.2 Design of cylindrical shell thickness.....           | 13          |
|                        | 7.3 Design of convex ends (heads and bases).....         | 14          |
|                        | 7.4 Design of concave base ends.....                     | 16          |
|                        | 7.5 Neck design.....                                     | 16          |
|                        | 7.6 Foot rings.....                                      | 17          |
|                        | 7.7 Neck rings.....                                      | 17          |
|                        | 7.8 Design drawing.....                                  | 17          |
| <b>8</b>               | <b>Construction and workmanship</b> .....                | <b>17</b>   |
|                        | 8.1 General.....   | 17          |
|                        | 8.2 Wall thickness.....                                  | 17          |
|                        | 8.3 Surface imperfections.....                           | 17          |
|                        | 8.4 Ultrasonic examination.....                          | 18          |
|                        | 8.5 Out-of-roundness.....                                | 18          |
|                        | 8.6 Mean diameter.....                                   | 18          |
|                        | 8.7 Straightness.....                                    | 18          |
|                        | 8.8 Verticality and stability.....                       | 18          |
|                        | 8.9 Neck threads.....                                    | 19          |
| <b>9</b>               | <b>Type approval procedure</b> .....                     | <b>19</b>   |
|                        | 9.1 General requirements.....                            | 19          |
|                        | 9.2 Prototype tests.....                                 | 20          |
|                        | 9.2.1 General requirements.....                          | 20          |
|                        | 9.2.2 Hydraulic burst test.....                          | 21          |
|                        | 9.2.3 Pressure cycling test.....                         | 24          |
|                        | 9.2.4 Base check.....                                    | 24          |
|                        | 9.2.5 Bend test and flattening test.....                 | 25          |
|                        | 9.2.6 Torque test for taper thread only.....             | 26          |
|                        | 9.2.7 Shear stress calculation for parallel threads..... | 26          |
|                        | 9.3 Type approval certificate.....                       | 27          |

|           |  |           |
|-----------|--|-----------|
| <b>10</b> | <b>Batch tests</b> .....   | <b>27</b> |
|           | 10.1 General requirements .....  | 27        |
|           | 10.2 Tensile test .....  | 28        |
|           | 10.3 Impact test .....   | 29        |
| <b>11</b> | <b>Tests/examinations on every cylinder</b> .....  | <b>31</b> |
|           | 11.1 General .....   | 31        |
|           | 11.2 Hydraulic test .....  | 31        |
|           | 11.2.1 Proof pressure test .....   | 31        |
|           | 11.2.2 Volumetric expansion test .....   | 31        |
|           | 11.3 Hardness test .....   | 32        |
|           | 11.4 Leak test .....   | 32        |
|           | 11.5 Capacity check .....  | 32        |
| <b>12</b> | <b>Certification</b> .....   | <b>33</b> |
| <b>13</b> | <b>Marking</b> .....   | <b>33</b> |
|           | <b>Annex A (normative) Description and evaluation of manufacturing imperfections in<br/>seamless gas cylinders</b> ..... | <b>34</b> |
|           | <b>Annex B (normative) Ultrasonic examination</b> .....  | <b>48</b> |
|           | <b>Annex C (informative) Example of type approval certificate</b> .....  | <b>53</b> |
|           | <b>Annex D (informative) Example of acceptance certificate</b> .....   | <b>54</b> |
|           | <b>Annex E (informative) Bend stress calculation</b> .....   | <b>57</b> |
|           | <b>Annex F (informative) An example of shear strength calculation for parallel threads</b> .....                         | <b>58</b> |
|           | <b>Bibliography</b> .....  | <b>60</b> |
