DIN EN 12493:2021-02 (E)

LPG equipment and accessories - Welded steel pressure vessels for LPG road tankers - Design and manufacture

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Materials 9
4.1 Environmental 9
4.2 Suitability 9
4.3 Pressure retaining parts 9
4.4 Non-pressure retaining parts 9
4.5 Welding consumables 9
4.6 Non-metallic materials (gaskets) 10
4.7 Inspection documents for materials 10

5 Pressure vessel design 10
5.1 Design conditions 10
5.2 Minimum thickness 10
5.3 Surge plates 11
5.4 Doubler plates 12
5.5 Stresses due to motion 12
5.6 Self-supporting pressure vessels 12
5.7 Vacuum conditions 12
5.8 Pressure vessel mountings 12
5.9 Internal pipework 13

6 Openings 13
6.1 General 13
6.2 Reinforcement of openings 13
6.3 Threaded connections 13
6.4 Manhole 13

7 Non-pressure retaining parts 14
7.1 Attachment welds 14
7.2 Position of attachment welds 14

8 Workmanship and construction 14
8.1 General 14
8.2 Environment 14
8.3 Control of materials 14
8.4 Acceptable weld details 15
8.5 Heat treatment and forming 15
8.6 Welding 17
8.7 Repairs to pressure envelope and direct attachment welds 19

9 Construction and workmanship of internal pipework 19

10 Manufacturing tests and examinations 19
10.1 General 19
10.2 Mechanical testing 20
10.3 Non-destructive testing 21
10.4 Non-destructive testing for welds 21
10.5 Qualification of non-destructive testing personnel 22
10.6 Visual examination of welds 22
10.7 Acceptance criteria 23
10.8 Safety precautions at the hydraulic test 23

11 External corrosion protection and finishing 23
11.1 External protection 23
11.2 Finishing operations 23

12 Marking 23

13 Records and documentation 23
13.1 Documentation obtained by the manufacturer 23
13.2 Records prepared by the manufacturer 23
13.3 Retention and supply of documents 24

Annex A(normative) Guidance on selection of materials grades 25

Annex B(normative) Reference temperatures for design 26

Annex C(informative) Alternative reference temperatures for design 27

Annex D(normative) Design 28

Annex E(inform ative) Example of joints 43

Annex F(normative) Allowable tolerances 47

Annex G(normative) Heat treatment 52

Annex H(informative) Typical method for measurement of shell peaking 53

Annex I(informative) Choice of non-destructive test methods for welds 56

Annex J(normative) Hydraulic pressure test 57
