DIN EN 17339:2025-02 (E)

Transportable gas cylinders - Hoop wrapped and fully wrapped carbon composite cylinders and tubes for hydrogen

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Symbols 10

5 Design and manufacture 10
5.1 General requirements 10
5.2 Liner 11
5.2.1 Metallic liner 11
5.2.2 Non-metallic liners 11
5.2.3 Design drawing 11
5.2.4 Design of ends 12
5.2.5 Neck ring 12
5.3 Composite overwrap 12
5.3.1 Materials 12
5.3.2 Winding 12
5.4 Finished cylinder 13
5.4.1 Design drawings 13
5.4.2 Autofrettage 13
5.4.3 Manufacturing requirements for the finished cylinder 14

6 Cylinder and material tests 14
6.1 General 14
6.2 Requirements and test methods 14
6.2.1 Test 1 - Composite material tests, including adhesives (where applicable) 14
6.2.2 Test 2 - Liner material tests 15
6.2.3 Test 3 - Liner burst test at ambient temperature (for metallic liners only) 15
6.2.4 Test 4 - Pressure test of finished cylinders at ambient temperature 16
6.2.5 Test 5 - Cylinder burst test 16
6.2.6 Test 6 - Resistance to pressure cycles at ambient temperature 17
6.2.7 Test 7 - Exposure to elevated temperature 19
6.2.8 Test 8 - Blunt impact test 19
6.2.9 Test 9 - Flawed cylinder test (only for fully wrapped cylinders) 21
6.2.10 Test 10 - Extreme temperature cycle test 22
6.2.11 Test 11 - Fire resistance test 23
6.2.12 Test 12 - Permeability test of cylinders with non-metallic liners 24
6.2.13 Test 13 - Torque test for taper threads 25
6.2.14 Test 14 - Shear stress calculation for parallel threads for steel liners and steel bosses 25
6.2.15 Test 15 - Neck strength 26
6.2.16 Test 16 - Neck ring 26
6.3 Failure to meet test requirements 26
6.3.1 Metallic liners 26
6.3.2 Finished cylinder 26

7 Conformity evaluation 27

8 Marking 27

Annex A (normative) Prototype, design variant and production testing 29

A.1 General 29
A.2 Type test 29
A.2.1 General 29
A.2.2 Definition of new design 29
A.2.3 Type test requirements 30
A.2.4 Type test certificate 31
A.3 Design variant testing 34
A.3.1 General 34
A.3.2 Definition of a design variant 34
A.3.3 Design variant test requirements 36
A.3.4 Design variant testing certificate 36
A.4 Production testing 39
A.4.1 General 39
A.4.2 Production test requirements 39
A.4.3 Liner batch tests and inspections 39
A.4.4 Composite materials batch tests and inspections 40
A.4.5 Tests and inspections of the finished cylinder 40
A.4.6 Batch acceptance certificate 41

Annex B (informative) Examples of type test and production testing certificates 42

B.1 Type test certificate - composite cylinders with metallic liners 42
B.2 Type test certificate - composite cylinders with non-metallic liners 43
B.3 Design variant approval certificate - composite cylinders with metallic liners 44
B.4 Production test certificate 45

Annex C (informative) Example of high velocity impact (bullet test) 47

C.1 Procedure 47
C.2 Criteria 47
C.3 Parameters to monitor and record 47

Bibliography 48
