

# ISO/TR 12391-2:2002-12 (E)

## Gas cylinders - Refillable seamless steel; Performance tests - Part 2: Fracture performance tests; Monotonic burst tests

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	References .....	1
3	Symbols .....	2
4	Background information .....	2
5	Experimental test programme .....	4
5.1	Types of cylinder tested .....	4
5.2	Material properties tests .....	6
5.3	Description of the flawed-cylinder burst test .....	7
6	Flawed-cylinder burst test results .....	9
6.1	Flawed-cylinder burst test procedure .....	9
6.2	Flawed-cylinder burst test results for group A materials .....	10
6.3	Flawed-cylinder burst test results for group B materials .....	11
6.4	Flawed-cylinder burst test results for group C materials .....	11
6.5	Flawed-cylinder burst test results for group D materials .....	11
6.6	Flawed-cylinder burst test results for group E materials .....	12
6.7	Flawed-cylinder burst test results for tests conducted under special conditions .....	12
7	Discussion .....	12
7.1	Background .....	12
7.2	ISO 9809-2 flawed-cylinder burst test procedures and acceptance criteria .....	13
7.3	Analysis by WG 14 to relate the flawed-cylinder burst test to Charpy-V-notch energy values .....	14
7.4	Adjustment to the measured Pf/Ps ratio to account for the local cylinder wall thickness ..	15
8	Summary and conclusions .....	16
Annex A (informative) Evaluation of the measurement uncertainty in the flawed-cylinder burst test		113
Bibliography .....		116
