Foreword 4

Introduction 5

1 Scope 5

2 Normative references 5

3 Terms, definitions and symbols and abbreviations 7
3.1 Terms and definitions 7

4 Design and manufacture 9
4.1 General 9
4.2 Liner 9
4.2.1 Metallic liners 9
4.2.2 Non-metallic liners 9
4.2.3 Design drawing 10
4.3 Composite overwrap 10
4.3.1 Materials 10
4.3.2 Winding 10
4.3.3 Cylinders without liners comprising two parts 11
4.4 Finished cylinder 11
4.4.1 Design drawings 11
4.4.2 Cylinders without liner 12
4.4.3 Autofrettage 12
4.4.4 Manufacturing requirements for the finished cylinder 12
4.4.5 Neck ring 12
4.4.6 Cylinder stability 12

5 Cylinder and material tests 13
5.1 General 13
5.2 Test procedures and test requirements 13
5.2.1 Test No. 1 - Composite material tests, including adhesives (where applicable) 13
5.2.2 Test No. 2 - Liner material tests 14
5.2.3 Test No. 3 - Liner burst test 15
5.2.4 Test No. 4 - Hydraulic proof test of finished cylinders 16
5.2.5 Test No. 5 - Cylinder burst test 16
5.2.6 Test No. 6 - Pressure cycle test 17
5.2.7 Test No. 7 - Artificial ageing test 18
5.2.8 Test No. 8 - Exposure to elevated temperature at test pressure 19
5.2.9 Test No. 9 - Cylinder body integrity impact tests 19
5.2.10 Test No. 10 - Drop test 23
5.2.11 Test No. 11 - Flawed cylinder test 24
5.2.12 Test No. 12 - Extreme temperature cycle test 25
5.2.13 Test No. 13 - Fire resistance test 26
5.2.14 Test No. 14 - Spike puncture test 27
5.2.15 Test No. 15 - Permeability test of cylinders with non-metallic liners or without liners 27
5.2.16 Test No. 16 - Torque test 28
5.2.17 Test No. 17 - Neck strength test 29
5.2.18 Test No. 18 - Neck ring test 29
5.3 Failure to meet test requirements 30
5.3.1 Metallic liners 30

5.3.2 Complete cylinder 30

6 Conformity evaluation 30

7 Marking 30

Annex A (normative) Prototype testing, design variant testing and production testing 31

A.1 General 31
A.2 Prototype testing 31
A.2.1 General 31
A.2.2 Definition of new design 31
A.2.3 Prototype testing requirements 32
A.2.4 Prototype testing certificate 33
A.3 Design variant testing 34
A.3.1 General 34
A.3.2 Definition of a design variant 34
A.3.3 Design variant test requirements 36
A.3.4 Design variant testing certificate 36
A.4 Production testing 38
A.4.1 General 38
A.4.2 Production test requirements 38
A.4.3 Liner batch tests and inspections 38
A.4.4 Composite materials batch tests and inspections 39
A.4.5 Tests and inspections of the finished cylinder 39
A.4.6 Batch acceptance certificate 40

Annex B (informative) Examples of type approval and production testing certificates 41

B.1 Type approval certificate - composite cylinders with metallic liners 41
B.2 Type approval certificate - composite cylinders with non-metallic liners 42
B.3 Type approval certificate - composite cylinders without liners 43
B.4 Design variant approval certificate - composite cylinders with metallic liners 44
B.5 Production test certificate 45

Annex C (informative) Manufacturers marking 47
