Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Materials 9
4.1 Suitability 9
4.2 Pressure retaining parts 11
4.3 Non-pressure retaining parts 11
4.4 Welding consumables 11
4.5 Non-metallic materials (gaskets) 11
4.6 Certification of materials 11

5 Design 11
5.1 General 11
5.2 Design conditions 12
5.2.1 Calculation pressure 12
5.2.2 Design temperature 12
5.2.3 Vacuum conditions 12
5.3 Calculation of thicknesses 12
5.3.1 Calculation 12
5.3.2 Minimum thickness for handling 12
5.4 Support loadings 13
5.5 Lifting lug loadings 13
5.6 Openings 13
5.6.1 General 13
5.6.2 Reinforcement 13
5.6.3 Position of welds 13
5.6.4 Fittings connections 14
5.7 Protection of fittings 14
5.7.1 General 14
5.7.2 End shrouds 14
5.7.3 Protective frame 14
5.7.4 Local protection 14
5.8 Rolling hoops 14
5.9 Ventilation openings 14

6 Workmanship and manufacture 15
6.1 General 15
6.2 Control and traceability of materials 15
6.3 Manufacturing tolerances 15
6.4 Acceptable weld details 15
6.4.1 General 15
6.4.2 Longitudinal welds 15
6.4.3 Joggle joints 16
6.5 Formed pressure parts 16

6.5.1 General ... 16
6.5.2 Heat treatment after forming ... 16
6.5.3 Testing of formed parts ... 17
6.5.4 Repeated tests ... 17
6.5.5 Visual examination and control of dimensions ... 17
6.5.6 Marking ... 18
6.5.7 Test certificate ... 18
6.6 Welding ... 18
6.6.1 General ... 18
6.6.2 Welding procedure specification (WPS) ... 18
6.6.3 Qualification of WPS ... 18
6.6.4 Qualification of welders and welding personnel ... 18
6.6.5 Preparation of edges to be welded ... 18
6.6.6 Execution of welded joints ... 19
6.6.7 Attachments and supports ... 19
6.6.8 Preheating ... 19
6.7 Post weld heat treatment ... 19
6.8 Repairs ... 19
6.8.1 Repairs of surface imperfections in the parent metal ... 19
6.8.2 Repair of weld imperfections ... 20

7 Inspection and testing ... 20
7.1 Visual examination of welds ... 20
7.2 Non-destructive testing (NDT) ... 20
7.3 Non-destructive testing techniques ... 21
7.3.1 General ... 21
7.3.2 Radiographic techniques ... 21
7.3.3 Ultrasonic techniques ... 22
7.3.4 Magnetic particle techniques ... 22
7.3.5 Penetrant techniques ... 22
7.4 Marking for all non-destructive testing techniques ... 22
7.5 Qualification of personnel ... 22
7.6 Acceptance criteria ... 22
7.7 Production test plates (coupon plates) ... 23
7.8 Impact tests ... 25

8 Final assessment ... 25
8.1 Pressure test ... 25
8.2 Lifting lugs ... 25
8.3 Final examination ... 25

9 Surface treatment and finishing ... 26
9.1 General ... 26
9.2 Finishing operations ... 26

10 Fittings ... 26
10.1 General ... 26
10.2 Leak tightness test ... 27
10.3 Protective frame ... 27
10.4 Tare weight ... 27

11 Marking ... 27

12 Prototype testing ... 27
12.1 General ... 27
12.2 Fatigue test ... 27
12.3 Burst test ... 28
12.4 Drop test ... 28
12.5 Lifting lugs ... 28

13 Records and documentation ... 28
13.1 Records to be obtained by the manufacturer ... 28

13.2 Documents to be provided by the manufacturer 28

Annex A (informative) Guidance on selection of material grades 30

Annex B (normative) Tolerances on drums 31

B.1 Mean external diameter 31
B.2 Out of roundness 31
B.3 Deviation from the straight line 31
B.4 Irregularities in circular profile 31
B.5 Thickness tolerance 32
B.6 Profile 32
B.7 Surface alignment 33
B.8 Attachments, nozzles and fittings 33

Annex C (normative) Hydraulic pressure test 34

C.1 Temporary fittings 34
C.2 Pressure gauges 34
C.3 Pressurising agent 34
C.4 Avoidance of shocks 34
C.5 Test procedure 34

Annex D (normative) Imperfections 35

Annex E (normative) Design formulae for drums 38

E.1 Allowable stresses 38
E.2 Design formulae 38
E.2.1 General 38
E.2.2 Cylindrical shell calculation 38
E.2.3 Torispherical end calculation 38
E.2.4 Ellipsoidal end calculation 39
E.2.5 Formulae for calculating C 40
E.3 Nozzle re-enforcement 41
E.3.1 General 41
E.3.2 Size of openings 41
E.3.3 Distance between openings or branches 42
E.3.4 Openings and branches 42
E.3.5 Cylindrical shells and dished ends with openings 42
E.3.6 Shell reinforcement 42
E.3.7 Extent of reinforcement 43
E.3.8 Elliptical openings 43
E.3.9 Welded branches 43
E.3.10 Compensating plates 43
E.3.11 Reinforcement -- General 43
E.3.12 Reinforcement by pads 43
E.3.13 Reinforcement by branches 44
E.3.14 Branch connections normal to the drum wall 44

Annex F (informative) Measurement of shell peaking 49

F.1 Profile gauge 49
F.2 Peaking survey 49

Annex G (informative) Examples of welded joints 52

Bibliography 56
