ISO 20703:2006-05 (E)

Gas cylinders - Refillable welded aluminium-alloy cylinders - Design, construction and testing

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 2
3.1 Terms and definitions 2
3.2 Symbols 2

4 Materials 4
4.1 General provisions 4
4.2 Heat treatment 4
4.3 Gas/material compatibility 5

5 Design 5
5.1 General provisions 5
5.2 Calculation of wall thickness 7
5.3 Design of convex ends (heads and bases) 8
5.4 Neck design 12
5.5 Foot-rings 12
5.6 Neck-rings 12
5.7 Shroud 12
5.8 Design drawing 12

6 Construction and workmanship 12
6.1 Seamless bodies 12
6.2 Welding 12
6.3 Non-destructive examination of welds 13
6.4 Surface defects 13
6.5 Neck threads 13
6.6 Out-of-roundness 14
6.7 Straightness 14
6.8 Eccentricity 14
6.9 Stability 14

7 Tests and examinations 14
7.1 General 14
7.2 Mechanical tests 14
7.3 Hydraulic burst test 21
7.4 Pressure-cycling test 23
7.5 Hydraulic test 24
7.6 Check on the homogeneity of a batch 24
7.7 Leakage test 24
7.8 Capacity check 24
7.9 Examination for neck folds 24

8 Conformity evaluation 25

9 Identification marks 25

10 Records 25

Annex A (normative) Corrosion tests 26

Annex B (normative) New design type testing and production testing 40

Annex C (normative) Description, evaluation of manufacturing defects and conditions for rejection of welded aluminium-alloy gas cylinders at time of visual inspection 44

Annex D (informative) Examples of new design type approval and production test certificates 48

Bibliography 54
