## Transportable gas cylinders - Periodic inspection and testing of welded steel pressure drums

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1 <b>Scope</b> .....		5
2 <b>Normative references</b> .....		5
3 <b>Intervals between periodic inspection and test</b> .....		5
4 <b>List of procedures for periodic inspection and test</b> .....		6
5 <b>Identification of pressure drum and preparation for inspection and test</b> .....		6
6 <b>Depressurization and de-valving procedures</b> .....		7
7 <b>External visual inspection</b> .....		7
8 <b>Internal visual inspection</b> .....		8
9 <b>Supplementary tests</b> .....		8
10 <b>Inspection of openings</b> .....		8
11 <b>Pressure test</b> .....		9
12 <b>Pressure drum repair</b> .....		10
13 <b>Inspection of valves</b> .....		11
14 <b>Final operations</b> .....		11
15 <b>Rejection and rendering pressure drum unserviceable</b> .....		13
<b>Annex A (informative) Pressure drums manufactured according to National Regulations</b> .....		14
<b>Annex B (normative) Inspection periods</b> .....		16
<b>Annex C (normative) Description, evaluation of defects and conditions for rejection of welded steel pressure drums at the time of visual inspection</b> .....		17
<b>Annex D (normative) Procedure to be adopted when de-valving and when a valve is suspected to be obstructed</b> .....		21
<b>Bibliography</b> .....		24
