Elastomeric seismic-protection isolators - Part 2: Applications for bridges - Specifications

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols		4
5 Classification		7
6 Requirements		8
7 Design rules		17
8 Manufacturing tolerances		25
9 Marking and labelling		32
10 Test methods		33
11 Quality assurance		33
Annex A (normative) Tensile stress in reinforcing steel plate		34
Annex B (normative) Buckling stability		36
Annex C (normative) Allowable tensile stress in isolator		37
Annex D (informative) Dependency of ultimate properties on shape factor		38
Annex E (informative) Minimum recommended tensile properties for rubber materials		41
Annex F (informative) Compressive stiffness		42
Annex G (informative) Determination of shear properties of elastomeric isolators		46
Annex H (informative) Determination of local shear strain due to compression		51
Annex I (informative) Maximum compressive stress		54
Bibliography		55
