Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols 3

5 Classification 6
5.1 General 6
5.2 Classification by construction 7
5.3 Classification by tolerance on shear properties 8

6 Requirement 8
6.1 General 8
6.2 Type tests and routine tests 9
6.3 Functional requirements 10
6.4 Design compressive force and design shear displacement 10
6.5 Performance requirements 10
6.5.1 General 10
6.5.2 Compressive properties 11
6.5.3 Shear properties 12
6.5.4 Tensile properties 12
6.5.5 Dependences of shear properties 13
6.5.6 Dependences of compressive properties 14
6.5.7 Shear displacement capacity 15
6.5.8 Durability 15
6.6 Rubber material requirements 16
6.6.1 General 16
6.6.2 Tensile properties 16
6.6.3 Properties after ageing in air 16
6.6.4 Hardness 17
6.6.5 Ozone resistance 17
6.6.6 Other properties 17
6.7 Dimensional requirements 17
6.8 Requirements on steel used for flanges and reinforcing plates 18
6.9 Requirement on lead material for LRB 19

7 Design rules 19
7.1 General 19
7.2 Shape factor 19
7.2.1 First shape factor 19
7.2.2 Second shape factor 20
7.3 Compression and shear properties 20
7.3.1 Compressive stiffness 20
7.3.2 Shear stiffness and equivalent damping ratio 20
7.4 Ultimate properties 21

7.4.1 Stability at zero displacement 21
7.4.2 Stability and failure under large shear displacements 22
7.4.3 Roll-out properties of elastomeric isolators with recessed or dowelled connections (Type III) 22
7.4.4 Tensile properties 23
7.5 Reinforcing steel plates 24
7.6 Connections 24

8 Manufacturing tolerances 24
8.1 General 24

8.2 Measuring instruments 25
8.3 Plan dimensions 25
8.3.1 Measurement method 25
8.3.2 Tolerances 25
8.4 Product height 26
8.4.1 Measurement method 26
8.4.2 Tolerances 27
8.5 Flatness 27
8.5.1 Measurement method 27
8.5.2 Tolerances 27
8.6 Horizontal offset 27
8.7 Plan dimensions of flanges 28
8.8 Flange thickness 28
8.9 Tolerances on positions of flange bolt holes 29

9 Marking and labelling 29
9.1 General 29
9.2 Information to be provided 29
9.3 Additional requirements 30
9.4 Marking and labelling examples 30

10 Test methods 30

11 Quality assurance 30

Annex A (normative) Tensile stress in reinforcing steel plate 31

Annex B (normative) Determination of ultimate property diagram based on experimental results 33

Annex C (informative) Minimum recommended physical properties of rubber material 36

Annex D (informative) Effect of inner-hole diameter and second shape factor on shear properties 37

Annex E (informative) Determination of compressive properties of elastomeric isolators 40

Annex F (informative) Determination of shear properties of elastomeric isolators 43

Annex G (informative) Method of predicting buckling limit at large deformations 48

Annex H (informative)Designoffixingboltsandflanges 55
