|----------------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                          | iv        |
| <b>1 Scope .....</b>                                                                   | <b>1</b>  |
| <b>2 Normative references .....</b>                                                    | <b>1</b>  |
| <b>3 Terms and definitions .....</b>                                                   | <b>1</b>  |
| <b>4 Classification.....</b>                                                           | <b>2</b>  |
| 4.1 Classes.....                                                                       | 2         |
| 4.2 Grades.....                                                                        | 2         |
| <b>5 Materials and construction.....</b>                                               | <b>3</b>  |
| 5.1 Hoses .....                                                                        | 3         |
| 5.2 Flotation material.....                                                            | 4         |
| 5.3 End fittings and end connections .....                                             | 4         |
| <b>6 Dimension and tolerances .....</b>                                                | <b>5</b>  |
| 6.1 Diameters.....                                                                     | 5         |
| 6.2 Hose assembly length.....                                                          | 5         |
| <b>7 Physical properties .....</b>                                                     | <b>5</b>  |
| 7.1 Rubber compounds.....                                                              | 5         |
| 7.2 Performance requirements.....                                                      | 6         |
| 7.2.1 Hydrostatic requirements .....                                                   | 6         |
| 7.2.2 Change in length.....                                                            | 7         |
| 7.2.3 Bending test.....                                                                | 7         |
| 7.2.4 Leakage of hose assemblies (proof pressure test).....                            | 8         |
| 7.2.5 Minimum reserve buoyancy .....                                                   | 8         |
| 7.2.6 Flotation material recovery .....                                                | 8         |
| 7.2.7 Adhesion between components.....                                                 | 9         |
| 7.2.8 Adhesion between end fitting and lining .....                                    | 9         |
| 7.2.9 Minimum tensile strength of empty hose assemblies.....                           | 9         |
| 7.2.10 Vacuum resistance.....                                                          | 9         |
| 7.2.11 Dimensions of flange and other connections.....                                 | 9         |
| 7.2.12 Visual examination.....                                                         | 9         |
| 7.3 Frequency of testing.....                                                          | 9         |
| <b>8 Test certificate or report.....</b>                                               | <b>10</b> |
| <b>9 Marking.....</b>                                                                  | <b>10</b> |
| <b>10 Recommendations for packaging and storage.....</b>                               | <b>10</b> |
| <b>Annex A (normative) Type tests and routine tests.....</b>                           | <b>11</b> |
| <b>Annex B (normative) Measurement of adhesion between end fitting and lining.....</b> | <b>13</b> |
| <b>Annex C (normative) Hose assembly tensile-strength test.....</b>                    | <b>16</b> |
| <b>Bibliography.....</b>                                                               | <b>18</b> |
