

# DIN EN 16481:2014-09 (E)

## Timber stairs - Structural design - Calculation methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
<b>1</b>	<b>Scope .....</b>	<b>4</b>
<b>2</b>	<b>Normative references .....</b>	<b>6</b>
<b>3</b>	<b>Terms and definitions, formula symbols and SI-units .....</b>	<b>7</b>
3.1	Terms and definitions .....	7
3.2	Notation of formula symbols .....	7
3.3	SI-units .....	11
<b>4</b>	<b>Principles for verification of mechanical performance characteristics .....</b>	<b>12</b>
4.1	Performance characteristics to be verified .....	12
4.2	Typical actions .....	12
4.3	Significant action combinations .....	12
4.3.1	General .....	12
4.3.2	Action combinations relevant for verification of usability/serviceability .....	13
4.3.3	Action combination for verification of the load-bearing capacity .....	13
4.4	Bearing resistance within the verification of the load-bearing capacity .....	13
<b>5</b>	<b>Determination of mechanical stress (stress resultants and deformations) .....</b>	<b>14</b>
5.1	General .....	14
5.2	Static systems and cross-section properties for tread of stairs .....	16
5.2.1	Parallel treads without riser .....	16
5.2.2	Parallel steps with riser .....	18
5.2.3	Tapered treads .....	19
5.2.4	Kite winders .....	22
5.3	Static systems for stair strings and their cross-sectional characteristics .....	24
5.3.1	Closed strings .....	24
5.3.2	Cut string .....	28
5.4	Calculation models for joints .....	32
5.4.1	General .....	32
5.4.2	Modelling of tread-string connections .....	33
5.4.3	Modelling of string-corner connections .....	44
5.4.4	Modelling of connections to the construction .....	46
5.5	Modelling of loads .....	49
5.5.1	Modelling of permanent loads .....	49
5.5.2	Modelling of the variable, equally distributed vertical load $q_{k,1}$ .....	49
5.5.3	Modelling of the variable and equally distributed horizontal load $q_{k,2}$ .....	50
<b>6</b>	<b>Verification within the limit state of serviceability .....</b>	<b>52</b>
6.1	General .....	52
6.2	Limit values of deformations .....	52
6.3	Verification of oscillation .....	53
<b>7</b>	<b>Verification within the limit state of load bearing capacity .....</b>	<b>53</b>
7.1	General .....	53
7.2	Verification of the load-bearing capacity of cross-sections .....	53
7.3	Verification of load-bearing capacity of the connections .....	54
7.3.1	Verification of load-bearing capacity of tread-string connections .....	54
7.3.2	Verification of the load-bearing capacity of string-corner connections .....	55
7.4	Verification of the load-bearing capacity of connections to the building .....	57
Bibliography .....		58
