

# DIN EN 1434-3:2009-01 (E)

## Heat meters - Part 3: Data exchange and interfaces; English version EN 1434-3:2008

---

Inhalt	Seite
Foreword .....	4
1 Scope .....	5
2 Normative references .....	5
3 Meter interfaces and protocols overview .....	6
4 Physical layer .....	6
4.1 General .....	6
4.2 Physical layer optical interface .....	6
4.3 Physical layer M-Bus .....	6
4.4 Physical layer wireless interface .....	7
4.5 Physical layer current loop interface .....	7
4.6 Physical layer Local Bus .....	7
5 Link layer .....	7
5.1.1 Link layer optical interface with the EN 13757-2 protocol .....	7
5.1.2 Link layer optical interface with the EN 62056-21 protocol .....	7
5.1.3 Link layer optical interface with automatic protocol recognition .....	7
5.2 Link layer of M-Bus and Local Bus .....	7
5.3 Link layer wireless interface .....	7
5.4 Link layer current-loop interface .....	8
6 Application layer .....	8
6.1 Application layer optical interface .....	8
6.1.1 Protocol modes according to EN 13757-3 for heat meters .....	8
6.1.2 Protocol modes according to EN 62056-21 for heat meters .....	8
6.2 Application layer M-Bus and Local Bus .....	9
6.2.1 General .....	9
6.2.2 Coding of data records .....	9
7 Application .....	9
7.1 General .....	9
7.2 Physical layer .....	9
7.3 Link layer .....	9
7.4 Application layer .....	9
7.5 Control applications .....	9
Annex A (informative) Recommendation for heat meter test interface .....	10
Annex B (informative) Additional information for heat meters .....	11
B.1 Additional information regarding the EN 62056-21 protocol .....	11
B.2 Data set .....	11
B.3 Coding of the data set identification number .....	12
B.3.1 Schematic structure .....	12
B.3.2 Values for "T" group code .....	12
B.3.3 Values for "UU", register codes .....	12
B.3.4 Values for "W", number of the tariff .....	15
B.3.5 Use of "*/&" and "VV" for prestored values .....	15
B.3.6 Coding of the unit in the data set .....	16
B.3.7 Coding of the value in the data set .....	16
B.3.8 Coding of the measured value .....	17
B.3.9 Coding of the error message .....	17
B.3.10 Coding of the date and/or time stamp .....	17
B.3.11 Presentation of related values .....	18

<b>Annex C (informative) Automatic protocol detection and wake-up for the optical interface .....</b>	<b>19</b>
<b>Annex D (informative) Usage of heat meters in control applications .....</b>	<b>21</b>
<b>D.1 Heat meter .....</b>	<b>21</b>
<b>D.1.1 General.....</b>	<b>21</b>
<b>D.1.2 Application layer: data records .....</b>	<b>21</b>
<b>D.1.3 Application: actuality of the data .....</b>	<b>21</b>
<b>D.1.4 Application layer: acceptable data types (DIFs).....</b>	<b>22</b>
<b>D.1.5 Application layer: acceptable units (VIFs) .....</b>	<b>22</b>
<b>D.2 Controller.....</b>	<b>22</b>
<b>D.2.1 Start until first answer.....</b>	<b>22</b>
<b>D.2.2 Start until first successful readout .....</b>	<b>23</b>
<b>Annex E (informative) Protection techniques for M-Bus meters against surge/lightning.....</b>	<b>24</b>
<b>Annex F (informative) Additional information about the master-unit for the M-Bus.....</b>	<b>29</b>
<b>F.1 Master side interface to the M-Bus .....</b>	<b>29</b>
<b>F.2 Master side interface for local data read out .....</b>	<b>29</b>
<b>F.3 Full size level converter .....</b>	<b>30</b>
<b>Bibliography .....</b>	<b>32</b>
